

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

AN
ARITHMETICAL
DICTIONARY;
OR,
BOOK OF REFERENCE:

Comprising
A SYSTEM OF PRACTICAL TABLES,

MADE BY A COMPOUND OF DECIMAL AND VULGAR FRACTIONS, OR EITHER A SERIES OF ARITHMETICAL PROGRESSION, AND SO ARRANGED AS TO GIVE THE COST OF ANY NUMBER OF ARTICLES AT ANY GIVEN PRICE (IN DOLLARS AND CENTS), FROM ONE SIXTEENTH OF ONE CENT TO TEN THOUSAND DOLLARS. ALSO, GIVING THE INTEREST, INSURANCE COMMISSION, BROKAGE, &c., OF ANY SUM OF MONEY AT ANY PER CENT. WHATEVER.

Likewise Embracing
A SYSTEM OF PRACTICAL ARITHMETIC,

CONTAINING A FEW OF THE MOST IMPORTANT AND CONVENIENT RULES FOR STATING AND WORKING PROPORTION, OR RULE OF THREE, PRACTICE, &c., WITH NUMEROUS EXAMPLES, SHOWING THE USE OF THE TABLES TO SERVE AS A GUIDE TO PRACTICAL BUSINESS.

TWENTIETH EDITION.

BY WILLIAM B. YOUNG.

NEW YORK:
CASPER C. CHILDS, 80 VESEY STREET.

1848.

Entered according to the act of Congress, in the year 1844, by
WILLIAM B. YOUNG
in the Clerk's office of the District Court for the District of Kentucky.

PREFACE TO TWENTY-EIGHTH EDITION.

THE favorable reception of the Arithmetical Dictionary, and the liberal patronage bestowed upon it, together with the increasing demand for the same, have again induced the author to revise, correct, and otherwise improve this Twenty-eighth Edition. Such alterations and amendments have been made as the experience of the Author has suggested. In addition to a treatise on Practical Arithmetic, see a system of Practical Book Keeping by single entry, and also a Practical Interest Calculator, showing interest on money (ready calculated) at 6, 7, 8, 10, and 12 per cent. It is therefore presumed that the work, with these advantages, will be found more useful and consequently more acceptable than heretofore. In practical Arithmetic (interspersed throughout the work), those Rules which are most generally used have been presented and examples and exercises under the same made somewhat extensive, that the student may early become familiar with their principles and expert in their application—such as Addition, Subtraction, Multiplication, Division, Vulgar and Decimal Fractions, Simple and Compound Interest, Loss and Gain, Equations, Fellowship, Proportion, Mensuration, &c., &c. The great utility of the work, however (aside from the Interest Calculator), consists in the Dictionary, or system of Tables, so arranged as to apply with equal facility to suit the following conveniences:

1. In showing the cost of any number of articles at any given price, (fractions being treated precisely as whole numbers).
2. In giving the yearly interest, insurance, commission, brokerage, &c., at any per cent. whatever.
3. In showing the number of square yards, square feet, square inches, &c., contained in any (ordinary) sized measurement, as flooring, roofing, weather-boarding, paving, plastering, &c.

In presenting this work to the public, the Author makes no pretensions to having discovered any new spring by which to put the youthful mind into action; nor any new method of communicating a knowledge of Arithmetic (however well calculated his system may be to teach the young idea how to shoot). He flatters himself, that his work will be found useful to all persons engaged in business requiring calculation. To those well versed in the science of Arithmetic, it will be at least a saving of time, a great desideratum to men of business, while it will enable them at the same time to test their correctness by a very brief process, and to those persons who may be deficient in the science of Arithmetic, or who have not confidence in their own ability to make a calculation, it will be of the greatest importance, from the fact, that it will enable them to transact business for themselves that they could not otherwise do, without assistance from some source or other. Its introduction into Schools and private families, it is believed, will be productive of good in many respects, as it will not only furnish both teachers, and parents, with a key or refer-

ence by which they may test the skill and correctness of their respective charges, but at the same time, they will be enabled to present to their view, a series of Tables so arranged as to exhibit the relative proportion that numbers bear to each other, the principle of Loss and Gain, and the complete harmony existing between Decimal and vulgar Fractions. By some, however, this system will no doubt be discarded on account of its simplicity, while to others this will prove its principal recommendation. Its design is an humble one: it proffers no advantages to the skillful in the science of calculating more than to abridge his labors. It proposes not to instruct the literary connoisseur, it presents no attractive graces of style, to charm; no daring flight, to astonish; no deep researches to gratify; but in the humblest style, it proposes to furnish those who may avail themselves of its benefits, with a system by which they may examine themselves, test their correctness, and facilitate their business. The Author is aware that his work will not be permitted to pass without some degree of censure, more especially from those who do not feel disposed to place merit on any production except such as may have emanated from themselves. He, however, invites the strictest scrutiny, and will cheerfully submit to the decision of that portion of the public who are willing, after testing its merits, to bestow upon it that meed of praise, to which its practical utility and general usefulness entitle it.

The work at present comprises three hundred and four large octavo pages, two hundred and thirty-two of which are connected; each page, however, can be used separately, to apply to a certain amount, which can be ascertained by a glance of the eye. The others contain a system of practical Book-keeping (by single entry), the Practical Interest Calculator, or book of interest, and also a system of practical Arithmetic. This last is interspersed throughout the book, and numbered at the bottom.

It is believed from the general character and arrangement of the work, that it will be easily comprehended by all persons who will carefully examine it; but in order to render it more plain and simple, the Author will add on the opposite page a few brief directions and explanations, relative to the manner in which the tables are to be used.

The Work, in conclusion, humble in style, and unpretending in dress, is respectfully submitted to the patronage of a generous and discriminating public.

THE AUTHOR.

Logan County, Kentucky.

EXPLANATORY REMARKS.

In describing the use, and manner of using the Tables of the Arithmetical Dictionary, or Book of Reference, we will first call the attention of the student to the regular and systematic appearance of the pages, particularly the rule and figure work. He will observe that there are four columns on each page, which are separated from the rest, by a set of double rules, these are placed at right angles, two being perpendicular on the left, and the other two horizontal across the top of each page. He will also observe by reference to page 1 (being 26th in the arrangement), that those columns represented in large full-faced type, commence with one-fourth, and extend at right angles, increasing by a regular series or ratio of proportions, that on the left, to 10; and that across the top to $2\frac{1}{2}$, thence the former directly, and the latter indirectly to 100. Those numbers brought to view in the columns immediately opposite and under, express the same numbers identically, by writing the fraction in a decimal form. (See opposite $\frac{1}{4}=25$; opposite $\frac{1}{2}=50$; opposite $\frac{3}{4}=75$, and opposite 1=100, thence 125, 150, 175, 200, and so on, increasing in like manner to 10,000.) These decimals may, by an easy transition of thought, be used to represent either a fraction or a whole number, or a whole number and fraction, as hereafter exemplified.

The student will bear in mind, that in getting the cost of a number of articles at a given price, those numbers brought to view in either the perpendicular or horizontal columns, may be used with equal propriety to represent a given commodity, by observing to consider those in the opposite columns (for the time being), as a given number of prices, whether in mills, cents, dimes, dollars, or eagles, the answer will always occur in that denomination (in the decimal currency), of which the price is apart, viz.: If your price be in mills, your answer will be in mills. If your price be in cents, your answer will be in cents. If your price be in dimes, your answer will be in dimes; and if your price be in dollars, then your answer will be in dollars. Varying in all cases according to the view taken in the outset, and treating fractions in every respect precisely as if they were whole numbers, both in price and commodity. For example, let 10, page 1, represent a given number of articles, say 10 lbs. of pork, beef, butter, lard, or something else, at a given price, say $2\frac{1}{2}$ cents per pound. Here we find the number representing the commodity, at the foot of the left hand, perpendicular column, the given price, $2\frac{1}{2}$ cents, we find in the horizontal column above. Then immediately opposite the one, and under the other, we have the cost of 10 lbs. at $2\frac{1}{2}$ cents per lb. Answer 25 cents. Reverse this question, say $2\frac{1}{2}$ lbs. at 10 cents. per lb., and the result will be the same. Then by the rule of proportion (or common sense, if you please), if 10 lbs. at $2\frac{1}{2}$ cents, cost 25 cents, then the same at $2\frac{1}{2}$ mills per lb., would cost 25 mills, 2 cents, and 5 mills, or

2½ cents. And for the same reason, 10 lbs., yards, gallons, or bushels, as the case may be, at 2½ dimes, would cost 25 dimes, or 250 cents (see decimal column above); and again for the same reason 10 lbs. at 2½ dollars per lb., will cost 25 dollars, exhibiting an increase (as you see) on the first number, in a ten-fold, and in a hundred-fold proportion, because ten mills make one cent, ten cents make one dime, ten dimes make one dollar, and so on. Any other number from one-fourth to one hundred, can be intelligibly varied in the same way. We will next present a few additional remarks in reference to those numbers brought to view in the second, or decimal column. In the first place you will recollect that there are only three fractions throughout this system of tables, viz.: one-fourth, one-half, and three-fourths. These are repeated again and again (see page 1), opposite $\frac{1}{4}=25$, (this being its decimal equivalent), opposite $\frac{1}{2}=50$; opposite $\frac{3}{4}=75$, and opposite $1=100$. These decimals (as above remarked), may be used to represent whole numbers, when standing alone; or when taken in connexion with the first number, they increase the first, in a hundred-fold proportion, as you will discover by the following example, while $\frac{1}{4}$ lb., yard, gallon, or bushel (as the case may be), at 2½ cents, cost 1¼ cents (this is a plain case), 50 lbs. at the same price, will cost 1¼ dollars; 75 lbs. at the same rate, will cost 1¾ dollars, or 1.87½ cents; and 100 lbs. will cost 2½ dollars, or 2.50 cents, and so of the rest. These last examples exhibit an increase on the first number, in a hundred-fold, and a downward increase (in the decimal column), equal to 25. We will next proceed to show how the questions and answers may be intelligibly varied, by exhibiting the increase on the first number only in a ten proportion, and a downward increase (in the column) equal to $\frac{1}{10}$ in either price or commodity. You observe by reference to any portion of the book (I mean embracing the system of tables), that there is a 5 and a 0 alternately brought to view on the right of the numbers, represented in the decimal column. Now by reserving mentally the right hand, or units figure of the decimal, and considering the 5 as $\frac{5}{10}$, or a half (this being its decimal equivalent), you exhibit the increase in a ten-fold proportion. See (page 2), opposite $10\frac{1}{2}=102,5$ or $102\frac{1}{2}$; opposite $10\frac{1}{4}=105,0$ or 105 ; opposite $10\frac{3}{4}=107,5$ or $107\frac{1}{2}$; opposite $11=110,0$ or 110 , and so of the rest throughout the whole system of tables. We will now show by a series of proportions, how the questions may be intelligibly varied, and the answers correctly shown from the same position, (see page 41st).

Let 15 represent a given commodity, say 15 yards, lbs., gallons, or bushels, as the case may be, of corn, wheat, rye, oats, barley, flaxseed, peas, beans, potatoes, turnips, or anything else (this being a matter of no consequence, call the commodity what you please), at a given price, say 12½ cents per yard, lb., or gallon, &c. The number (15), here representing the number of articles we find in the left hand perpendicular column (as before), the price 12½ cents; we find in the horizontal column above, then opposite the one, and under the other, we find the cost, or answer, viz.: 187½ cents, or 1.87½. Reverse this question, say 12½ yards, lbs., &c., at 15 cents, and the result will be the same. 15 yards at 12½ mills per yard, would cost 187½ mills, or 18 cents 7½ mills, ($18\frac{3}{4}$), the same at 12½ dimes (see decimal column), 125,0; say 125 cents per yard. Answer 187½ dimes, (18.75 cents); and 15 yards at 12½ dollars per yard, will

cost $187\frac{1}{2}$ dollars. Reverse this again, say $12\frac{1}{2}$ yards or lbs. at 15 mills, 15 cents, 15 dimes, or 16 dollars, and the result will be precisely the same, as above noticed. Again, if 15 lbs. cost $187\frac{1}{2}$ cents, what will 1,500 lbs. come to? Answer $187\frac{1}{2}$ dol. Then it is evident if 15 lbs. cost $187\frac{1}{2}$ cents, and 1,500 lbs. cost $187\frac{1}{2}$ dollars, that 150,0 or 150 lbs. will cost $187\frac{1}{2}$ dimes, or 18.75 cents, any other number can be intelligibly varied in the same way. A few more examples and we will leave the subject with you: If $18\frac{3}{4}$ yards at $12\frac{1}{2}$ cents, cost $234\frac{3}{8}$ cents, what will $57\frac{1}{2}$ yards come to? (See page 45.) Answer $7.18\frac{3}{8}$ cents. Again, if $62\frac{1}{2}$ yards at $10\frac{1}{4}$ cents, cost 640 $\frac{5}{8}$ cents, what will $43\frac{3}{4}$ yards come to at the same rate? Answer $448\frac{7}{8}$ cents. And again, if 50 lbs. cost 625 cents, how many lbs. can I buy with $234\frac{3}{8}$ cents? Trace the column until you reach this number, then opposite which, in the left hand column. See answer $18\frac{3}{4}$, and so of the rest.

By a close examination, and a little sober thinking on the part of the student, he will discover that by taking into consideration the different positions (as exhibited above), the work is double throughout. For example, one fourth of a cent, is equal to $2\frac{1}{2}$ mills, $\frac{1}{2}$ is equal to 5, and $\frac{3}{4}$ of a cent is equal to $7\frac{1}{2}$ mills and so on, by reference to these several positions. You will observe that the answers completely harmonize; the same remark is true, in reference to dimes, dollars, &c. You will also observe that the correctness of any assumed position can be tested by adding two numbers together. The above remarks, (as the student doubtless has observed), apply with equal facility to explain the use of the tables, in showing the cost of any number of articles at a given price, the (yearly) interest, insurance, commission, brokerage, &c., at any per cent. Also, the number of squares, square feet, &c., as used in carpenter's measure, for flooring, roofing, weather-boarding, &c. For example, the floor, or wall of a room 20 feet in length, and $17\frac{1}{2}$ feet broad, would contain 350 square feet, or 3 square and 50 feet. (See page 59.) Here you have almost an indefinite variety of lengths, breadths, &c., sufficient we presume, for all practical purposes. In getting the number of square feet, as used in plank or board measure (by the tables), find your length in feet, and breadth in inches, just as you would the cost of a number of articles. Divide this number by 12, and you have the exact measurement—then count your plank, and you have the size of the pile. Example, required the number of square feet contained in a plank, slab, or any flat surface, say 40 feet in length, and 15 inches broad (see page 52), opposite 40, and under 15, (see p. 600). Divide this by $12\frac{600}{100}$. Answer, 50 feet. Or you can cross the pile and measure, by the wholesale, thereby abridging, or entirely superseding the labor of measuring lumber, &c., with the tape-line (a custom in practice), as you have all the lengths, breadths, &c., that would probably be called for in ordinary business, embracing every fourth part of a foot and inch. You will, however, find arranged in the first part of this system, a table for measurement of plank, scantling, &c., where the measurement of one piece, embracing the ordinary lengths, breadths, &c., is exhibited, these you can increase to any number required by the rules given above.

Here the author could wish that any, and every number could have been represented without the aid of addition. This, however, would have swelled the size of the work greatly beyond its present limits, and then (of necessity) it must have been imperfect. A work arranged to suit

every vague question that might chance to occur in the buying and selling business, would be voluminous indeed, and perhaps more objectionable, and of less utility than the present system, which gives the answers complete, from $\frac{1}{4}$ to the square of one hundred in mills, cents, dimes, dollars, &c., (found as above described). From 50 to 1,000 (as brought to view in the decimal column) by reserving the right hand figure the increase on the first number is represented in a ten-fold proportion, and the downward increase is equal to $2\frac{1}{2}$, and from 25 to 10,000 the increase is in a hundred-fold proportion, and showing a downward increase equal to 25. Therefore, any number above one hundred, or one thousand, falling between these extremes, and not represented by either, the fractional part (of a hundred, or thousand as the case may be), that supplies the deficiency, will be found correctly represented in its proper place, which add, for the answer. Example, required the cost of 5,000 lbs. of tobacco at $2\frac{1}{2}$ cents per lb. (see page 5th.) Answer 125 dollars. Required the cost of 5,045 lbs. see 125 dollars. Cost of 5,000 lbs. and opposite 45, (first column) see $1,12\frac{1}{2}$ cents, which add for the answer, thus 125,00, cost of 5,000.
and $1,12\frac{1}{2}$, cost of 45.

Ans. \$126, $12\frac{1}{2}$.

Recollect just here, that your answer (as above stated) will always occur in that denomination (in the decimal currency), of which the price is a part. This must be understood in a qualified sense, being correct to the letter, embracing all numbers, within the limits of one hundred; but when the commodity exceeds 100, if your price be in mills, your answer will be in cents; if your price be in cents, your answer will be in dimes, and if your price be in dimes, your answer will be in dollars. For example, if 18 yards at $12\frac{1}{2}$ cents per yard, cost 225 cents (page 41), then 180,0 (reserve mentally the 0), 180 yards, at $12\frac{1}{2}$ dimes, will cost 225 dollars, and 1,800 yards, at $12\frac{1}{2}$ cents, for the same reason, will cost 225 dollars. These are plain matters of fact, and easily understood.

In the next, and last place, we will offer a few remarks relative to the manner in which these tables may be used in giving the number of acres contained in a plot, capable of being thrown into a square, of whatever number of poles in length and breadth soever. It is true, there is a limit beyond which, this can have no pretensions; but we presume it is not convenient in practice, and theory without practice, is a dead letter. Say, for example, you have a field or plot of ground, 60 poles in length, and 16 poles broad, how many acres are contained in the plot (see page 63 opposite 60), and under 16, see 960 square poles. You observe in the decimal column under 16, 160,0 by reserving mentally the (0) on the right of this number you have 160 left. This is the number by which you would divide, were you to make the calculation practically, then 160 in 960 will be contained six times. Look opposite 960 (as above) in the left hand perpendicular column; see 6,0 (reserve the 0, which in this case is a supernumerary), and you have the answer, 6 acres. Were this 0, which we have just laid aside for the present, any other figure, it would represent so many tenths of an acre. Any other number of square poles may be divided, and the number of acres contained in them, shown, by bringing them to this column (as above noticed). (I should have said any number of square poles under 1600, this being the

limit to the number brought to view in this column). However, you will observe by conceiving a cipher 0, to be annexed to the number, when brought to the column headed 16, you will be able to find within a few square poles of the number sought, if not the exact number. For example, we wish to know the number of acres contained in a plot of land, 88 rods in length, and $67\frac{1}{2}$ rods broad. Page 191, opposite 88, and under $67\frac{1}{2}$; see 5,940 square poles. Look on page 61st, opposite 37 and under 16, you see the number 592 which, with the cipher 0 annexed, would make good the number sought, save 20 poles. Then opposite this number on the left, see the answer, 37 acres, wanting 20 poles. Any other sized plot may be measured in the same way, or after the same manner.

EXTRA TABLES—1, 2, 3, &c., these embrace ten pages placed in the first part of the book, they have been carefully arranged upon the principle of a Ready-reckoner, and particularly adapted to the convenience of those persons dealing in heavy articles. Where the advance in prices is frequently a small fraction of a cent on the lb., yard, or bushel (as the case may be), as in the sale of tobacco, sugar, coffee, lead, iron, steel, &c., the explanation given above, will serve also for these. Each table is complete within itself, to the amount of one cent. Let a few examples suffice. What costs a hoghead of sugar, weighing 950 lbs. at $4\frac{1}{2}$ cents per lb. See extra table, No. 5, opposite 900, and under $4\frac{1}{2}$. See cost of 900 lbs.; viz., \$43.87 $\frac{1}{2}$, opposite 50, and under $4\frac{1}{2}$. See cost of 50 lbs., and add for the answer thus, 43.87 $\frac{1}{2}$, cost of 900 lbs.
2.43 $\frac{3}{4}$. cost of 50 lbs.

Ans. \$46.31 $\frac{1}{4}$.

These calculations, you will observe, are all put to the test on the same page, see opposite 900 (in the decimal column) and under $4\frac{1}{2}$ (as above). 43 $\frac{1}{2}$ dollars equal to \$43.87 $\frac{1}{2}$ cents, and opposite 50 in the same column, above the black line 243 $\frac{3}{4}$, as before. Any other question can be answered precisely in the same way or after the same manner.

In describing the Index or Reference, to the almost unlimited number of calculations embraced in this work, we would just remark that the numbers have been classed off in such a manner as to correspond with the heads of the tables, in one direction, and the folios of heads of columns in the other (extending at right angles). Any number falling between the numbers here brought to view, will be definitely pointed out by those on the same page. For example, you wish to know the cost of 22 $\frac{1}{2}$ at 37 $\frac{1}{2}$ mills, cents, dimes, or dollars (as the case may be). In the Index, or Reference, you find the number 22 $\frac{1}{2}$, (representing the commodity), as above noticed, in the left hand perpendicular column. The price 37 $\frac{1}{2}$, you find in the horizontal column above, then opposite 22 $\frac{1}{2}$, and under 37 $\frac{1}{2}$, you see 78 (the number sought). This refers you to the page on which the above calculation, together with ten thousand others (more or less) can be found. Reverse this question, say 37 $\frac{1}{2}$ at 22 $\frac{1}{2}$, and the result will be the same identically, 67 $\frac{1}{2}$ at 12 $\frac{1}{2}$, see page 46th; 97 $\frac{1}{2}$ at 47 $\frac{1}{2}$, see page 154th, and so of the rest. Recollect, however, that when the given number or numbers, fall between those exhibited in the columns on the left and above, you will either, move on, or drop to the next succeeding number. For example, 30, or any other number between 37 $\frac{1}{2}$ and 30, you find on page 101, but 31 or 32, or any other number between 30 and 40,

at 30 cents, dimes, &c. (as noticed above), you will find on page 102; all between 40 and 50, you will find on page 103; all between 50 and 60 on page 104, and so on. Those numbers brought to view in the decimal columns in the Index, completely harmonize in every respect with the first numbers according to the directions given above. This Index, as the student has perhaps already imagined, is unnecessary (in practice), as he can frequently, by a glance of the eye, across the heads of the columns, find the numbers sought, in less time than he would be in turning to the Index. It however shows that the system has been carried out, and having the two presented, he can have his choice either to use it or not.

See Index arranged on two large pages placed in front. Next succeeding these, see table showing the gross and neat weight of pork as used in merchandize, when bought and sold on foot; opposite this, see Practice Table, and also table for measurement of lumber (plank, scantling, &c).

See Interest Table showing the interest in mills, cents, dimes, dollars, &c., at 6, 7, 8, 9, and 10 per cent. Pages 221 and 224 inclusive. These last named tables explain themselves.

FORMS FOR WRITING NOTES, RECEIPTS, ETC.

PAYABLE TO ORDER.

\$150.00

Nine Months after date I promise to pay to the order of Francis A. Hill, the sum of One Hundred and Fifty Dollars, for value received.
May 10th, 1848.

WILLIAM B. YOUNG.

JOINT NOTE.

\$410²⁵/₁₀₀

Russellville, Ky.

Ninety days after date, We, or either of us, promise to pay to the order of C. T. Davis, at the Office of the Planters' Bank of Tennessee, at Nashville, the sum of Four Hundred and Ten ²⁵/₁₀₀ Dollars, for value received.

Witness, our hands, this — day of — 184—

W. B. YOUNG.
J. R. GRINTER.

DUE BILL.

\$10.00

On demand, I promise to pay G. W. Beasley or order Ten Dollars, for value received. This — day of — 184—

J. W. BRITT.

BILL OF EXCHANGE.

\$500.00

Nashville, May 10th, 1848.

Three days after sight, pay to the order of J. H. Young, Five Hundred Dollars, for value received, and charge to account of Yours, &c.

DAVID BROWDER.

Messrs. Holden. Porter & Co., New York.

AN ORDER.

\$75.00

Russellville, May the — 184—

Mr. F. A. Hill—Sir: Please pay to W. Simons, or Bearer, Seventy-Five Dollars, and this my order shall be your receipt for the same.

J. W. TEMPLETON.

RECEIPT FOR CASH.

\$34.00

Received of Adam Winlock Thirty-Four Dollars, Balance of his acc't with me, for the Year closing Dec. 31st, 1837.

J. C. GRINTER.

Clarksville, January the 1st, 1848.

A TABLE

Showing the Gross and Neat Weight of Pork as used in Merchandize.

This Table shows the Gross and Neat Weight, of Pork contained in any sized Hog, weighing from One to Three Hundred lbs, as it is usually bought and sold, on foot, it being customary with the parties, to allow (or, to use the phrase of Hog-Merchants, to knock off), one-fourth, one-eighth, and one-sixteenth, on the lb., varying according to the weight or size of the animal; this being equal to 25 lbs. on the first Hundred, 12½ lbs. on the second, and 6½ lbs. on the third Hundred lbs., all above 300 lbs. being considered by the parties as Neat Weight.

Gr. Wt.	Loss.	Neat Wt.	Gross Wt.	Loss.	Neat Wt.	Gross Wt.	Loss.	Neat Wt.

EXPLANATION.

The first, fourth, and seventh columns represent the Weight of the Hog, varying from 1 to 300 lbs., opposite which on the right, see the Loss, or deduction, and also the Neat Weight.

EXAMPLE.—Required, the gross and neat weight of a Hog weighing 240 lbs. See 240 represented in column 7th, opposite which in the next column on the right, see 40, and on the right of this see 200. The first of these two numbers, viz. 240, represents the gross weight of the Hog, the second, 40, shows the amount to be taken off, and the third, 200, exhibits the neat weight. Should the weight of the hog fall between any of the numbers, brought to view in the Table, above, you will always find the number which supplies the deficiency arranged in its proper place, in the same column above and opposite this, the loss and neat weight of the same, then add for the answer.

ADDITION.

ADDITION teaches to collect several numbers into one, called the amount.

RULE.—Write down any one of the numbers, and place under it the rest, in such a manner that units may stand under units, tens under tens, hundreds under hundreds, &c., and draw a line underneath—add up each column successively and set down the amount, observing to carry 1 for every ten (which is simply writing down the right hand figure, and adding the number expressed by the left hand figure to the next column), and so proceed until all the columns have been considered. The whole amount of the last column must be set down.

EXAMPLES.

$$\begin{array}{r}
 123 \\
 321 \\
 232 \\
 313 \\
 \hline
 \text{Ans. } 989 \\
 866 \\

 \hline
 \end{array}$$

Add 350, 725, 967 and 421 together, and tell their amount.

Ans. 2463.

Bought a Coat for \$4, a pair of Boots for \$3.50 cts., a pair of Pantaloon for \$9.37½ cts., and a Vest for \$1.75 cts. What is the cost of them all?

Ans. \$18.62½ cts.

A Farmer has four fields, one contains 14 acres, another 32, a third 35, and a fourth 41. How many acres are contained in them all?

Ans. 122 acres.

A man has four purses, the first contains \$25, the second \$125, and the other two \$150 each. How many Dollars are contained in the four purses?

Ans. \$450.

SUBTRACTION.

SUBTRACTION is used to ascertain the difference between two given numbers.

RULE.—In working Subtraction observe to write down the larger number first, and under it the smaller, with units under units, tens under tens, &c., then beginning at the right hand, or units place, take the lower figure from the one that stands immediately above it (if the upper figure be larger than the lower), and set down the remainder, but if the upper figure be less than the lower, conceive 10 to be added to the upper figure, take the lower figure from the amount and set down the remainder. When 10 is thus added to the upper figure there must be one carried to the next lower, which subtract from the one above it as before, and so proceed.

PROOF.—Add the less number and the remainder together, and the amount will be equal to the greater number.

EXAMPLES.

Subtract 237	from 345.	Ans.	108	From 37	From 325
Subtract 1781	from 1845.	Ans.	64	Take 16	Take 121
Subtract 1350	from 4289.	Ans.	2939	Ans. <u>21</u>	Ans. <u>204</u>
Subtract 320	from 480.	Ans.	160		

From 3281	From 4187652	From 8437965	From 59432170
Take <u>1493</u>	Take <u>1325761</u>	Take <u>6319487</u>	Take <u>25710234</u>

A merchant bought five bolts of Domestics, containing 437 yards, from which he sold 255 yards; how much had he left?

Ans. 182.

Bought a load of Apples, containing $134\frac{1}{2}$ bushels, from which was sold 37 bushels; what number of bushels remained?

Ans. $97\frac{1}{2}$.

If I buy 640 acres of Land, and sell to one man 320 acres, to another 104, to another 101, and to another 15; How much will I still have left?

Ans. 100 acres.

Deposited in Bank \$250 at one time, \$120 at another, and \$116 at another. I have since drawn out \$320 to pay a debt; how much is remaining in Bank?

Ans. \$166.

MULTIPLICATION.

MULTIPLICATION is a short method of performing Addition, when the same number is required to be added a given number of times. There are three separate parts in Multiplication, viz.: The sum to be multiplied, called the multiplicand: the sum by which you multiply, called the multiplier, and the result of the operation, called the product. The multiplicand and multiplier are likewise both together called Factors, or that by which the operation is performed. When the multiplier does not exceed 12, the operation may be performed by the following Rule: Write down the multiplicand, and under it the multiplier in such a manner that units may stand under units, tens under tens, &c., multiply each figure separately, and set down the amount, observing to carry one for every ten, as in Addition.

EXAMPLES.

Multiply	31254	by 2.	Ans.	62508	31254
Multiply	87493	by 3.	Ans.	262479	2
Multiply	45213	by 4.	Ans.	180852	Ans. <u>62508</u>
Multiply	53674	by 5.	Ans.	268370	
Multiply	42462 $\frac{1}{2}$	by 6.	Ans.	254775	42462 $\frac{1}{2}$
Multiply	9876543	by 7.	Ans.	69125801	6
Multiply	1234567	by 8.	Ans.	9876536	Ans. <u>254775</u>
Multiply	4670	by 9.	Ans.	42030	

When the multiplier exceeds 12, multiply by each figure separately, observing to set the first product of each figure under its respective multiplier, and add the results together for the answer.

Multiply	125	by 13	Ans.	1625	775
Multiply	480	by 16	Ans.	7680	125
Multiply	775	by 125	Ans.	96875	<u>3875</u>
Multiply	354	by 250	Ans.	88500	1550
Multiply	37	by 37	Ans.	1369	775
Multiply	75	by 50	Ans.	3750	<u>96875</u>
Multiply	91	by 19	Ans.	1729	

What will be the cost of 25 $\frac{3}{4}$ lbs. Coffee, at 17 cts. per lb.?

(see page 60.)

Ans. \$4.37 $\frac{3}{4}$ cts.

What will 257 $\frac{1}{2}$ (decimally) 257.5 bushels of Apples cost, at 17 cts. per bushel?

(see page 60.)

Ans. \$43.7 $\frac{3}{4}$ dimes.

What will be the cost of 2575 yds. of Calico, at 17 cts. per yard?

(see page 60.)

Ans. \$437 $\frac{3}{4}$.

SIMPLE DIVISION.

DIVISION is a short method of performing a number of Subtractions.

There are four terms to be used in performing an operation in Division, namely, the Divisor, or the number by which you divide, the Dividend, or number to be divided, the Quotient, or answer, and the Remainder, or number left when the operation is completed. When the Divisor does not exceed 12, the operation may be performed by short Division.

RULE.—Write down the Dividend, and on the left of it the Divisor, draw a line underneath, and proceed to perform the operation by first considering the number of times the Divisor will be contained in the first left hand figure, or figures of the Dividend, and write down the result, observing to notice whether there be any remainder. If there be no Remainder, consider the number of times the Divisor will be contained in the next figure, and so on; but, if there be a Remainder, conceive it to be joined or prefixed to the next figure as so many tens, into which divide as before, and set down the result.

EXAMPLES.

What is the quotient of 54 divided by 2?

Divisor 2)54 **Dividend.**
Ans. $\overline{27}$

What is the quotient of 5850 divided by 6 ?
$$\begin{array}{r} 6 \overline{)5850} \\ \underline{975} \end{array}$$

Long Division is used when the Divisor exceeds 12. Rule 1st. Take for the first Dividual as few of the left hand figures of the Dividend as will contain the Divisor, place the result on the right of the Dividend. 2d. Multiply the Divisor by this number. 3d. Subtract its product from the Dividual, and set down what remains (which must always be less than the Divisor.) 4th. Bring down the next figure to the right of the Remainder, to form a second Dividual, and proceed as before, until all the Dividend figures have been employed. When there are cyphers on the right of both factors, the operation may be shortened by cutting off an equal number from each.

EXAMPLE.—Fifteen men wishing to divide \$1875 equally among them not having the advantage of an arithmetical education, they sat down to count the money. What was found to be the share of each? **Ans.** \$125.

Operation.

15) 1875(125

15

37

30

75

75

Or when the Divisor is the exact product of any two figures in the Multiplication Table, the operation may be performed thus :

Divide first by one figure, and that product by the other.

3) 1875

$$\begin{array}{r} 5 \overline{) 625} \end{array}$$

PROMISCUOUS EXAMPLES.

1st. What is the Interest of 675 Dollars, at $4\frac{3}{4}$ per cent. per annum?

Ans. $\$32.06\frac{1}{4}$ cts

2d. What is the cost of 4 Bushels and 3 Pecks of Apples, at $9\frac{3}{4}$ cts. per Bushel?

Ans. $46\frac{5}{16}$ cts.

3d. What is the Commission for selling 1000 Dollars worth of Goods, at $2\frac{3}{4}$ per cent.?

Ans. $\$27.50$ cts.

4th. What will 1 Hhd. of Tobacco come to, weighing, neat, 1975 lbs., at $3\frac{3}{4}$ cts. per lb.?

Ans. $\$74.06\frac{1}{4}$ cts.

PRACTICAL EXERCISES.

What is the cost of 9 Bushels and 3 Pecks of Apples at $27\frac{3}{4}$ cts. per Bushel?
 Ans. \$2.70 $\frac{9}{16}$ cts.

Bought 18 Fruit Baskets for $9\frac{1}{2}$ cts. each, and sold 9 of them again for $18\frac{3}{4}$ cts. each, and the rest at $31\frac{1}{4}$ cts. each. What was gained by the transaction?
 Ans. \$2.79 cts.

If I buy 13 Gallons and 3 Quarts of Molasses, at $19\frac{1}{4}$ cts. per gallon, and sell the same again at $43\frac{3}{4}$ cts. per gallon. What will I gain by the transaction?
 Ans. \$3.36 $\frac{7}{8}$ cts.

What must be paid for 775 lbs. of Coffee at $13\frac{3}{4}$ cts. per pound?
 Ans. \$106.56 $\frac{1}{2}$ cts.

Bought in Market the following articles, viz.:

Three Bacon-hams, weighing 39 lbs. and 2 qrs. (or $39\frac{1}{2}$ lbs.), at $8\frac{3}{4}$ cts. per lb., 16 lbs. of Beef at $2\frac{3}{4}$ cts. per lb., $27\frac{3}{4}$ lbs. of Mutton, at $4\frac{1}{2}$ cts. per lb., $9\frac{1}{2}$ lbs. of Butter at $11\frac{3}{4}$ cts. per lb., and two Turkeys, at $68\frac{3}{4}$ cts. each. What is the amount of my bill?
 Ans. \$7.63 $\frac{5}{8}$ cts.

PROMISCUOUS EXAMPLES.

1st. What is the cost of 5 Kegs of manufactured Tobacco, weighing neat, 1825 lbs., at $14\frac{3}{4}$ cts. per lb. Ans. \$269.18 $\frac{3}{4}$ cts.

2d. A. paid B. \$209.25 cts. for the use of \$1550 for one year, at what rate per cent. per annum, did A. pay interest. Ans. 13 $\frac{1}{2}$ per cent.

3d. What is the Commission for collecting \$9425, outstanding notes and accounts, at 12 $\frac{1}{2}$ per cent. Ans. \$1178.12 $\frac{1}{2}$ cts.

4th. What cost 14 $\frac{1}{2}$ lbs. of Powder at 31 $\frac{1}{2}$ cts. per lb. Ans. \$445 $\frac{5}{8}$ cts.

PRACTICAL EXAMPLES.

1st. Bought 16 Bushels and 3 Pecks of Dried Pears, at $93\frac{3}{4}$ cts. per Bushel, and sold the same again, for $98\frac{1}{2}$ cts. per Bushel, what was the first cost, the amount sold for, and the gain?

Ans. first cost, $\$15.70\frac{5}{8}$, sold for $\$16.49\frac{7}{8}$, gain $79\frac{9}{16}$ cts.

2d. If the cost of $18\frac{1}{2}$ Gallons of Brandy be $\$3.46\frac{7}{8}$ cts., how much can I buy for $\$4.12\frac{1}{2}$ cts.?

Ans. 22 Gallons.

And what is the cost of one Gallon at the same rate.

Ans. $18\frac{3}{4}$ cts.

3d. Sold 2000 lbs. of Tallow Candles at $18\frac{1}{2}$ cts. per lb. what am I to receive?

Ans. $\$370$.

4th. Sold to an Upholsterer 1825 lbs. of new Feathers, at $18\frac{3}{4}$ cts. per lb., $97\frac{1}{2}$ yds. Bed Ticking, at $19\frac{1}{4}$ cts. per yard, and 48 lbs. of Sewing Thread, at 20 cts. per lb., what was the cost of each, separately, and the cost of the whole?

Ans. Feathers cost $\$342.18\frac{3}{4}$ cts.

Ticking, $18.76\frac{7}{8}$

Thread, 9.60

Cost of the whole, $\$370.55\frac{5}{8}$ cts

5th. What must be paid for one bolt of blue Calico, containing 43 yds, and 3 qrs. at $18\frac{1}{2}$ cts. per yard?

Ans. $\$8.09\frac{3}{4}$ cts.

6th. A certain house contains 97 windows, and each window contains 16 squares of glass, how many squares are contained in the whole building?

Ans. 1552.

 2)\frac{3}{4} = \frac{3}{4}
 \end{array}$$

The student will observe that the preceding Example has been wrought by eight different processes, in order to show the complete harmony existing between Decimal and Vulgar Fractions (as exhibited in this Work): First, by Cross Multiplication; second, by a Compound of Decimal and Vulgar Fractions; third, by Decimals; fourth, by Practice, &c., &c. See page 155.

SIMPLE INTEREST.

INTEREST is an allowance made for the use of money, relative to which are four particulars, viz.: Principal, Time, rate per cent., and amount. Principal is the sum of Money for which Interest is to be computed. Rate per cent., is the Interest of 100 Dollars, Pounds, &c., for one year. Amount is the sum of the Principal and Interest added together.

RULE.—When the time is one year, and the rate per cent. is any number of Dollars, Pounds, &c., Multiply the principal by the rate per cent., and Divide the product by 100 (or separate two figures from the right of the product), all on the left of these will be Dollars or Pounds, as the case may be.

EXAMPLE.—What is the Interest on \$1200, for one year, at 6 per cent.; at 7 per cent., &c.

$$\begin{array}{r} \$1200 \\ 6 \\ \hline 1,00\overline{)72,00} \\ \text{Ans. } \$72 \end{array}$$

$$\begin{array}{r} \text{Ans. } \$72, \text{ and } \$84. \\ \$1200 \\ 7 \\ \hline \text{Ans. } \$84,00 \end{array}$$

To find the Interest on any sum of money, for any number of months, at any given per cent.:

RULE.—Multiply the principal by the given per cent., and Divide by 12, for the Interest of one Month, then increase this Monthly Interest to the time required, by Multiplication or Addition, as best suits convenience; or first find the Interest at 6 per cent., by Multiplying the principal by half the number of Months; Multiply the Interest thus found by any other rate per cent. and Divide by 6 for the answer. (See Interest Table, page 222), also, Practical Tables throughout the Book.

EXAMPLE.—What is the Interest on \$30, for 8 Months, at 6 per cent., at 7 per cent., at 10 per cent.?

$$\begin{array}{r} \text{Operation, } 30 \\ 4 \text{ Half the time} \\ \hline \$1,20 \\ 7 \\ \hline 6\overline{)840} \\ \$1,40 \end{array}$$

Ans. at 6 per cent.

Ans. at 7 per cent.

$$\begin{array}{r} \text{Operation, } \$1,20 \\ 10 \\ \hline 6\overline{)1200} \\ \$2,00 \end{array}$$

Ans. at 10 per ct.

To find the Interest on any sum of Money, for any number of days, at 6 per cent., Multiply the number of Dollars by the number of days, and Divide by 60 for the answer. At any other rate per cent., see preceding Rule and reference.

EXAMPLE.—What is the Interest on \$40, for 18 days, at 6 per cent., also, at 7 per cent.

$$\begin{array}{r} 40 \\ 18 \\ \hline 320 \\ 40 \\ \hline 6,0\overline{)72,0} \\ \text{Ans. } 12 \text{ cts. at 6 per cent.} \end{array}$$

$$\begin{array}{r} 12 \\ 7 \\ \hline 6\overline{)84} \\ \text{Ans. } 14 \text{ cts. at 7 per cent.} \end{array}$$

PROMISCUOUS EXAMPELS.

1st. If I pay \$618.75 cts. for the use of \$2500, at what rate per cent. per annum do I pay interest?
Ans. $24\frac{3}{4}$ per cent.

2d. Bought $27\frac{3}{4}$ Acres of Land at \$23.50 cts per Acre, what does it come to?
Ans. 652.12 $\frac{1}{2}$ cts.

3d. If 27 bushels and 3 pecks of Wheat cost \$6.93 $\frac{3}{4}$ cts., what is the cost of one bushel?
Ans. 25 cts.

4th. What is the value of $\frac{3}{4}$ of a yard of Tape, at $\frac{3}{4}$ of a cent per pard?
[See page 1st.]

- Ans. $\frac{9}{16}$ cts.

Calculate the amount of the following Bills,

Nashville, May 21st, 1843.

S. P. SHARP,

Bought of Wm. W. SMITH,

90 $\frac{3}{4}$ lbs. Chocolate, at 25 $\frac{3}{4}$ cts. per lb.
 96 $\frac{1}{2}$ " Coffee, " 25 $\frac{1}{4}$ " "
 27 $\frac{1}{2}$ " Tea, " 25 $\frac{1}{4}$ " "
 30 " Ginger, " 29 $\frac{3}{4}$ " "
 16 $\frac{3}{4}$ " Cheese, " 13 $\frac{1}{4}$ " "
 19 $\frac{1}{2}$ " Pepper, " 22 $\frac{3}{4}$ " "
 68 $\frac{3}{4}$ " Sugar, " 12 $\frac{1}{4}$ " "

\$78.77 $\frac{3}{4}$ cts.

Received payment,

Wm. W. Smith.

Boston, June 15th, 1844.

SILVESTER TAYLOR,

Bought of SIMON BOLIVER,

28 yards Flannel, at 91 $\frac{3}{4}$ cts. per yard,
 97 $\frac{1}{2}$ " Brown Sheeting, " 26 $\frac{3}{4}$ " "
 27 $\frac{3}{4}$ " Bed Ticking, " 29 " "
 37 $\frac{1}{2}$ " Bleached Sh'ting, " 18 $\frac{3}{4}$ " "
 47 $\frac{1}{2}$ " Broad Cloth, " \$3.75 " "
 16 $\frac{1}{2}$ " Silk Vesting, " 85 $\frac{3}{4}$ " "
 129 $\frac{3}{4}$ " Striped Jean, " 28 $\frac{1}{2}$ " "

\$294.95 $\frac{1}{4}$ cts.

Received payment,

Simon Boliver.

VULGAR OR COMMON FRACTIONS.

A **FRACTION** is one or more parts of a whole number, according as the same is divided; every Fraction possesses two characters, viz.: a Numerator and a Denominator. The Numerator is so called because it numerates, or numbers the parts of a whole number expressed by the Fraction. The Denominator is thus named because it gives or shows the number of parts contained in a whole Number. The upper number of the Fraction is always known as the Numerator; the lower number as the Denominator.

RULE.—To reduce a Fraction to its lowest Terms, or, to get the smallest Fractional part of any number, continue to Divide both the Numerator and the Denominator by any number that will Divide them both without a remainder. **EXAMPLES.**—Reduce $\frac{12}{18}$ to its lowest terms. Ans. $\frac{2}{3}$.

OPERATION.— $2) \frac{12}{18} = \frac{6}{9}$ $2) \frac{6}{9} = \frac{3}{4.5}$ Ans., or thus:— $4) \frac{12}{18} = \frac{3}{4.5}$ Ans. as before.

Reduce $\frac{10}{18}$ to its lowest Terms. $2) \frac{10}{18} = \frac{5}{9}$ Ans.

Reduce $\frac{9}{144}$ to its lowest Fractional number. Ans. $\frac{1}{16}$.

RULE.—To reduce a whole or mixed Number, as $5\frac{3}{4}$, $8\frac{7}{8}$, &c., to an improper Fraction, Multiply the whole number by the Denominator of the Fraction, add the Numerator to the Product, and place the Denominator under the result.

EXAMPLES.—Reduce $37\frac{3}{8}$ to an improper Fraction. Ans. $\frac{301}{8}$.

Reduce $43\frac{3}{4}$ to an improper Fraction. Ans. $\frac{175}{4}$.

$$\begin{array}{r} 37\frac{3}{8} \\ 16 \\ \hline 601 \\ 16 \text{ Ans.} \end{array}$$

RULE.—To change an Improper Fraction to a whole, or mixed Number, Divide the Numerator by the Denominator, the Product will be a whole Number. If there be any remainder, write it over the given Denominator, for the Numerator of the Fraction.

EXAMPLES.—How many Dollars in $\frac{17}{16}$ of a Dollar? Ans. $1\frac{1}{16}$.

Reduce $\frac{120}{16}$ to its proper Terms. Ans. 90.

$$\begin{array}{r} 16) 17(1\frac{1}{16} \text{ Ans.} \\ 16 \\ \hline 1 \\ 16 \end{array}$$

It will be easily perceived that these Examples and the preceding, prove each other.

RULE.—To Reduce a Compound Fraction to a single one, Multiply all the Numerators together for a new Numerator, and all the Denominators, for a new Denominator, which reduce, if necessary, to their lowest Terms.

What is $\frac{2}{3}$ of $\frac{3}{4}$ of $\frac{5}{8}$ of 20?

Ans. $6\frac{1}{4}$.

What is $\frac{1}{8}$ of $\frac{10}{1}$ of one Dime?

Ans. $8\frac{3}{4}$.

What is $\frac{4}{5}$ of $\frac{3}{2}$ of $\frac{5}{8}$?

Ans. $\frac{1}{2}$.

Operation, $\frac{2}{3} \times \frac{3}{4} \times \frac{5}{8} = \frac{50}{96}$

20

30

96) 600(6 $\frac{1}{4}$ Ans.

576

24

24) 96=4

RULE.—To Reduce Fractions of different Denominations to a common Denominator. Multiply each Numerator into all the Denominators, except its own, for a new Numerator, and all the Denominators into each other for a common Denominator.

EXAMPLES.—Reduce $\frac{3}{12}$, $\frac{5}{12}$ and $\frac{7}{12}$, to a Common Denominator.

Ans. $\frac{3 \times 8}{96}$ $\frac{5 \times 8}{40}$ $\frac{7 \times 8}{56}$.

Denominators $12 \times 8 \times 12 = 1536$ Common Denominator.

Reduce $\frac{3}{12}$ and $\frac{5}{12}$ to a Common Denominator.

Ans. $\frac{3}{12}$ $\frac{5}{12}$.

NOTE.—Compound Fractions must be reduced to simple ones, before finding the Common Denominator.

EXAMPLE.—Reduce $\frac{1}{2}$ of $\frac{3}{4}$ and $\frac{5}{8}$ to a Common Denominator.

Operation.

$\frac{1}{2} \times \frac{3}{4} = \frac{3}{8}$ $\frac{5}{8}$ $8 \times 8 = 64$ Com. Denominator.

ADDITION OF VULGAR FRACTIONS.

RULE.—When Fractions have a Common Denominator, as $\frac{3}{12}$, $\frac{5}{12}$, $\frac{7}{12}$ &c., Add their Numerators together for a new Numerator, and their Denominators for a new Denominator, which reduce, if necessary, to its lowest Terms. If the Fractions are unlike, as $\frac{3}{12}$, $\frac{5}{8}$, $\frac{7}{12}$, &c., first Reduce them to a Common Denominator, then Add the Numerators together, which reduce, if necessary, to a whole or mixed number.

Add $\frac{3}{4}$ and $\frac{2}{3}$ of a Dollar together.

Ans. $1 \frac{1}{12}$

Operation.

$3 \times 3 = 9$

$2 \times 8 = 16$

$8 \times 3 = 24$

$\frac{3}{4} \times \frac{2}{3} = \frac{6}{12}$ $24)25(1 \frac{1}{12}$
 $\frac{24}{1}$
 $\frac{1}{12}$

SUBTRACTION OF VULGAR FRACTIONS.

RULE.—Prepare the Fractions as in Addition, then the difference of the Numerators written over the Denominator will give the difference required. If the lower number of the Fraction be the greater, Subtract it from the Denominator and Add the difference to the upper number, write down the result and carry one, as in Compound Subtraction.

A bought $24 \frac{3}{4}$ yds. of cloth, and sold to B $16 \frac{3}{4}$ yds.; how much has he left?

Ans. $7 \frac{5}{8}$ yds.

Operation.

From $24 \frac{3}{4} = 24 \frac{6}{8}$ $\frac{3}{4} \times \frac{3}{4}$
 Take $16 \frac{3}{4} = 16 \frac{6}{8}$ $\frac{3}{4} \times \frac{3}{4}$
 $\frac{7 \frac{5}{8}}{32 \quad 32}$

It will be seen that the Fractions are only here reduced, which will generally be found most convenient in Practice.

MULTIPLICATION OF VULGAR FRACTIONS.

RULE.—Multiply all the Numerators together for a new Numerator, and all the Denominators for a new Denominator. (See Reduction.)

NOTE.—It will frequently be necessary to prepare the given Terms of the Fractions for the operation.

DIVISION OF VULGAR FRACTIONS.

Prepare the Fractions, if necessary, invert the Divisor and Multiply the Numerators together for a new Numerator, and the Denominators together for a new Denominator.

Divide $\frac{15}{16}$ by $\frac{5}{8}$.

$\frac{5}{8} \times \frac{15}{16} = \frac{75}{128}$ $80)120(1 \frac{1}{2}$
 $\frac{80}{40}$
 $40) \frac{75}{128} (\frac{1}{2}$

Baltimore, May 10th, 1843.

Mr. JOSEPH B. STOUT,

Bought of SIMON D. DASHER,

97 $\frac{1}{4}$ lbs.	Flour,	at	3 $\frac{3}{4}$ cts.	per lb.
44 lbs.	Beef,	"	2 $\frac{3}{4}$ "	per lb.
37 $\frac{1}{2}$ galls.	Brandy,	"	91 $\frac{3}{4}$ "	per gal.
18 $\frac{3}{4}$ bushels	Corn meal,	"	43 $\frac{3}{4}$ "	per bush.
67 $\frac{1}{2}$ yds.	Brown Jean,	"	87 $\frac{1}{2}$ "	per yard.
78 $\frac{3}{4}$ "	Fine Linen,	"	86 $\frac{3}{4}$ "	"
9 oz.	Indigo,	"	17 $\frac{1}{2}$ "	per oz.
7 "	Madder,	"	8 $\frac{1}{2}$ "	"
175 lbs.	Bar Iron,	"	6 "	per lb.
97 $\frac{3}{4}$ "	Nails,	"	13 $\frac{1}{2}$ "	"
37 $\frac{1}{2}$ "	Sole Leather,	"	37 $\frac{1}{2}$ "	"
3 Sides	Upper Do.,	"	\$2.75 "	each.

What is the amount of the above Bill, including Interest on the same at 6 per cent., for 13 months and 3 days?

Ans. \$237.90 $\frac{1}{80}$ cts.

DECIMAL FRACTIONS.

A DECIMAL Fraction is an artificial way of expressing or writing a Common or Vulgar Fraction, and has always for its Denominator a Unit, with as many Cyphers annexed, as there are Figures in the Numerator, and are either Tenths, Hundredths, &c., according to the number of Figures in the Numerator, thus: $\frac{1}{10}$, $\frac{12}{100}$, $\frac{125}{1000}$, and so on. It is, however, customary to write the Numerator of the Fraction only, with a Comma, or separatrix prefixed to it, thus: ,1 ,12 ,125, &c. A mixed Number, consisting of a whole Number and a Decimal, as $25\frac{5}{10}$, is written thus: 25,5.

It has already been noticed, no doubt, that in Numeration of whole Numbers, the value of the figures increase in a tenfold proportion, from the right hand towards the left; but, on the contrary, by a careful perusal of the following Table, it will be observed that their values decrease in the same proportion, counting from right to left, as before.

TABLE.

9	8	7	6	5	4	3	2	1	1	2	3	4	5	6	7	8	9
Hundreds of Millions.	Tens of Millions.	Millions.	Hundreds of Thousands.	Tens of Thousands.	Thousands.	Hundreds.	Tens.	Units.	Tens.	Hundreds.	Thousands.	Tens of Thousands.	Hundreds of Thousands.	Millions.	Tens of Millions.	Hundreds of Millions.	Billions.

NOTE.—Cyphers placed after Decimal Figures, neither increase nor decrease the value of the Fraction; thus, $\frac{5}{10}$, $\frac{50}{100}$, $\frac{500}{1000}$, are all of the same value; but Cyphers prefixed to Decimals, decrease them in a tenfold proportion; thus: ,5, ,05, ,005, being $\frac{5}{10}$, $\frac{5}{100}$, $\frac{5}{1000}$, are of different value.

ADDITION OF DECIMALS.

RULE.—Write the given numbers according to their value, viz. : units under units, tens under tens, &c., and add the numbers precisely as in Simple Addition, observing to set the points in the product exactly under those in the given sum.

EXAMPLE.—Add $3\frac{75}{100}$, $8\frac{25}{100}$, $4\frac{05}{100}$ and $\frac{25}{100}$.
Ans. 16,30.

Add \$3,75, \$4,25, \$7,50, and \$9,875, together.
Ans. \$25,375.

Add $1\frac{253}{1000}$, $2\frac{875}{1000}$, $3\frac{467}{1000}$, $\frac{15}{1000}$, together.
Ans. 8,245.

Operation.	
3,75	,25
8,25	,07
4,05	1,125
,25	3,875
Ans. 16,30	Ans. 5,320

SUBTRACTION OF DECIMALS.

RULE.—Set down the numbers as in Addition of Decimals, the less under the greater, and Subtract as in Simple Subtraction, observing to set the separatrix immediately under the separating points above.

EXAMPLE.—Bought a cask of Vinegar, containing $27\frac{75}{100}$ gals.; how much can I sell from it and reserve for my own use $16\frac{875}{1000}$ gallons.
Ans. 10,875 gals.

Operation.	
27,75	
16,875	
Ans. 10,875	

MULTIPLICATION OF DECIMALS.

RULE.—Set down the Multiplier under the Multiplicand, as in Simple Multiplication, and proceed to Multiply without any regard to the points.

When the operation of Multiplying is completed, point off as many Decimal Figures as there are Decimals in both Factors, and there place the Decimal point. If there be not as many Figures in the Product as there are Decimals in the two Factors, prefix Cyphers till the number be obtained, and then fix the Decimal point.

EXAMPLES.

How many bushels of Wheat in three Garners, each containing 63,25 of a bushel ?

Ans. 189,75 bush.

Operation.

Multiply 475 by 2,5. Ans. 1,1875.

Multiply 68,7 by 2,5. Ans. 171,75.

63,25

3

189,75

At \$2,25 cents per yard, what will 15,25 of a yard come to ?

Ans. \$31,3125.

DIVISION OF DECIMAL FRACTIONS.

RULE.—Write the numbers down and Divide as in whole numbers ; point off a sufficient number of Decimal places in the Dividend ; if there are not figures enough in the Quotient for this purpose, supply the deficiency by prefixing Cyphers to the Quotient. When the Divisor has more Decimal places than the Dividend, annex as many Cyphers to the Dividend as will make the Decimals in both equal ; the value of the Quotient in such cases will be a whole number.

EXAMPLES.

Divide 486,70 by 2. Ans. 243,35.

Divide $25\frac{7}{100}$ by 4. Ans. 643,75.

Divide $7\frac{1}{2}$ by 9. Ans. $788\frac{1}{2}$.

Operation.

2)486,70

243,35 Ans.

REDUCTION OF DECIMAL FRACTIONS.

To change a Vulgar or Common Fraction to its equivalent Decimal.

RULE.—Annex Cyphers to the Numerator, and Divide by the Denominator ; continue this process till there is no remainder, or until a Decimal is obtained sufficiently exact for the purpose required. Recollect there will be as many Decimal Figures in the Quotient as there have been Cyphers annexed. But, if there are not Figures enough in the Quotient for this purpose, prefix Cyphers until a sufficient number be obtained.

EXAMPLE.—Change $\frac{1}{10}$, $\frac{1}{2}$, and $\frac{1}{4}$, to their proper Decimals.

PROPORTION, OR THE SINGLE RULE OF THREE.

By Proportion, or Rule of Three, we are enabled to ascertain the proportion which numbers bear to each other. It is called the Rule of Three because there are three Terms given to find a fourth.

RULE.—Write that Term in the third place, which is of the same name or kind with that in which the answer is required; consider whether the answer ought to be greater or less than this third Term; if it is to be greater, write the greater of the two remaining Terms on the left of the third for a second Term, and the less on the left of the second for the first Term. But if the answer is required to be less than the third term, write the less Term in the second place, and the greater in the first.

When the question is thus stated, reduce the third Term to the lowest denomination mentioned in it; reduce the first and second Terms to the same denomination, and to the lowest denomination mentioned in either of them—then multiply the second and third Terms together, and divide the product by the first Term, the result will be the fourth Term or answer, in the same denomination to which the third Term was reduced, which Term reduce, if necessary, to that denomination in which the answer is required.

EXAMPLE.—PROOF BY REVERSING THE STATEMENT.

If $12\frac{3}{4}$ lbs of Allspice cost $\$1.65\frac{3}{4}$ cts., what will $29\frac{1}{4}$ lbs. cost?

[See pages 50 and 51.]

Ans. $\$3.80\frac{1}{4}$ cts.

$$\begin{array}{rcl}

COMPOUND INTEREST.

COMPOUND Interest may be defined thus: it is Interest upon Interest.

RULE.—First find the amount of the principal for one year; by adding the interest to the principal; make this the principal for the second year, add the interest as before, and then find it for the third year, and so proceed. Continue to multiply and add, as many times as there are years named in the given question, the last result will be the amount, from which subtract the principal, the remainder will be the Compound Interest.

EXAMPLE.—What will be the Compound Interest of \$150, for two years, at 6 per cent.?

Princ. 1st yr. \$150

6
\$9,00

int. 1st yr. 9

amt. 159
6
\$9,54

Princ. 2d. yr. \$159,

9,54

amount 2d. yr. 168,54

Princ. 1st. yr. 150,00

Ans. Comp. Int. \$18,54

The Principal, Interest, and Time, being given to find the rate per cent.

RULE.—Divide the given Interest by the Interest of the given sum, at 1 per cent. for the given time; the quotient will be the required rate per cent.

EXAMPLE.—If a man receive \$6 25 cents for the use of \$50, 12 months; what is the rate per cent. ? (See page 44.)

Ans. 12½ per cent.

FELLOWSHIP.

FELLOWSHIP is a rule by which Merchants, Adventurers, &c., trading in company with a joint stock, are enabled to ascertain each partners particular share of the gain or loss in proportion to his interest in the joint stock, When the several stocks in company are considered without regard to time:

RULE.—Multiply each individual stock by the gain or loss, and Divide by the sum of the several stocks.

EXAMPLE.—Three men, A, B and C, trading in company with a joint stock, A put in \$25, B \$50, and C \$75, they gained \$30; what is the share of each?

A's stock \$25

B's " 50

C's " 75

Sum of the stocks \$150

B's "

10

C's "

15

\$30

When the several stocks are considered with regard to time:

RULE.—Multiply each man's stock by the time it is continued in trade, and proceed as above directed, for the answer.

INSURANCE.

INSURANCE is an allowance of so much per cent. made to persons to make good the losses sustained by Fire, Storms, &c. The instrument that binds the contracting parties is called a Policy. The sum paid for Insurance is called a premium.

RULE.—Proceed precisely as if required to find the Interest for one year. (See Simple Interest, and Tables throughout the Work.)

EXAMPLES.

What will be the Premium for Insuring an East India Ship and Cargo, valued at \$9700, at $9\frac{1}{2}$ per cent.?

Ans. \$945,75 cts.

What is the Premium for Insuring a Wool Factory, valued at \$3750, at $12\frac{1}{2}$ per cent.

Ans. \$468,75 cts.

9700

$9\frac{1}{2}$

87300

4850

2425

Ans. 945,75

(See page 40.)

LOSS AND GAIN.

When the prices of goods are given, to find what is the rate per cent. of Loss or Gain.

RULE.—Make a Vulgar or Common Fraction by writing the Gain or Loss (found by subtraction) for a Numerator, and the cost of the article for a Denominator, then change it to a Decimal, i. e. Multiply by 100, and Divide by the cost for the Loss or Gain per cent.

EXAMPLE.

A Merchant bought Cloth for 60 cents per yard, and sold it for \$1,10 cents; what was the gain per cent?

Ans. $83\frac{1}{3}$ per cent.

Sold for \$1,10

First cost 60

50

$\overline{60)5000(83\frac{1}{3}}$ Ans.

480

200

180

$20)180 = \frac{9}{10}$

Or thus, as $60 \div 50 \times 100$

100

$\cdot 60)5000(83\frac{1}{3}$

480

200

180

$20)60 = \frac{3}{10}$

A Bookseller bought a lot of Books for 40 cts. per copy, and sold them again for \$1,10 cents per copy; what was the gain per cent?

Ans. 175 per cent.

A man bought 50 bushels of Corn Meal at 30 cents per bushel, and sold it again for 27 cents per bushel; what was the loss on the whole, and loss per cent?

Ans. loss on the whole, \$1,50 cents; loss 10 per cent.

PRACTICAL EXAMPLES, wrought by Proportion or RULE OF THREE.

If the cost of $46\frac{1}{2}$ yds of Carpeting be \$22.08 $\frac{1}{2}$ cts., what will $54\frac{3}{4}$ yds come to?

Ans. \$26.00 $\frac{5}{8}$ cts.

If 1 bbl of Apple Vinegar, containing $49\frac{3}{4}$ galls. cost \$22.88 $\frac{1}{2}$ cts., what is the cost of one gallon.

Ans. 46 cts.

galls	:	galls.	:	\$ cts
$49\frac{3}{4}$:	1	:	22.88 $\frac{1}{2}$
4	:	4	:	4

It will be readily seen that every part of this system abounds in practical examples in proportion, which only requires a little ingenuity on the part of the Practitioner to enable him to discover them.

yds.	:	yds.	:	\$ cts.

PRACTICE.

Practice is a short method of working such sums in the Rule of Three, as have one, for their first Term. Among the various rules given, by which the cost of any number of Articles may be ascertained, when the given price is an aliquant part of a Dollar, as $\frac{1}{8}$, $\frac{3}{8}$, $\frac{1}{4}$, &c., the following, will generally be found the most convenient in practice, which is simply to multiply the given quantity by the numerator of the fraction, and divide the product by the denominator for the answer, in Dollars, and fractional parts of a Dollar.

When there is a fractional part of the commodity brought to view, as $\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$, &c., reduce the fraction to a decimal, and proceed as above directed.

NOTE.—To reduce a Vulgar Fraction to a Decimal, annex two Cyphers to the Numerator, and divide by the Denominator.

$$\text{Thus:—}\frac{1}{4} : 4)100 \\ \underline{25}$$

$$\frac{1}{2} : 2)100 \\ \underline{50}$$

$$\frac{3}{4} : 4)300 \\ \underline{75}$$

$$\frac{3}{8} : 8)300 \\ \underline{37\frac{1}{2}}$$

EXAMPLE.

What will $87\frac{1}{2}$ gallons of Peach Brandy cost, at at $62\frac{1}{2}$ cents ($\frac{5}{8}$ of a Dollar) per gallon.

Ans. \$54.68 $\frac{3}{4}$ cts.

$$\begin{array}{r} 87.50 \\ 5 \\ \hline \end{array}$$

$$8)43750$$

Ans. \$54.68 $\frac{3}{4}$ — $\frac{3}{4}$ cts.

What will be the cost of $137\frac{3}{4}$ lbs. of Powder, at $\frac{3}{8}$ of a Dollar ($37\frac{1}{2}$ cts.) per lb.

Ans. \$51.65 $\frac{5}{8}$ cts.

$$\begin{array}{r} \text{Lb.} \\ 137.75 \\ 3 \\ \hline \end{array}$$

$$8)41325$$

Ans. \$51.65 $\frac{5}{8}$ cts.

Bought 9875 lbs. of Powder, at $41\frac{1}{4}$ cts. per lb., what does it amount to?

Ans. \$4122.81 $\frac{1}{4}$ cts

$$\begin{array}{r} \text{lbs.} \\ 9875 \\ 41\frac{1}{4} \\ \hline 9875 \\ 39500 \\ 4937\frac{1}{4} \\ 2468 \\ \hline \$4122.81\frac{1}{4} \end{array}$$

If I buy $41\frac{1}{4}$ bushels of Hemp seed, at $96\frac{1}{4}$ cts per bushel, what must I pay?

Ans. $41.22\frac{1}{4}$ cts.

$$\begin{array}{r} \text{cts.} \\ 96,75 \text{ decimally.} \\ 41\frac{1}{4} \text{ bushels.} \\ \hline 9875 \\ 39500 \\ 4937\frac{1}{4} \\ 2468\frac{3}{4} \\ \hline \$41.22,81\frac{1}{4} = \$41.22\frac{1}{4} \end{array}$$

PRACTICAL EXERCISES FOR THE SLATE.

What must be paid for the making of 5875 Pairs of coarse Shoes, at $58\frac{1}{2}$ cts. per pair?

Ans. \$3436 $\frac{1}{4}$
or \$3436.87 $\frac{1}{2}$ cts.

What will a lot of Shoe-thread cost, weighing $58\frac{1}{2}$ lbs. at $58\frac{3}{4}$ cts. per lb.?

Ans. \$34.36 $\frac{1}{4}$ cts.

If the cost of 6000 yards of Carpeting be 3585 dollars, What is the price of one yard?

Ans. 59 $\frac{3}{4}$ cts.

A. bought 70 bushels of Wheat, at $57\frac{3}{4}$ cts. per bushel, and sold it again immediately for 60 cts. per bushel. What did he gain by the transaction?

Ans. \$1.57 $\frac{1}{2}$ cts.

What will 3 Firkins of Goshen Butter come to, weighing neat, $113\frac{1}{2}$ lbs. at $16\frac{3}{4}$ cts. per lb.

Ans. \$19.01 $\frac{1}{2}$ cts.

What will 3 quarts of Molasses cost at $43\frac{3}{4}$ cts. per gallon?

Ans. 32 $\frac{1}{8}$ cts.

If $59\frac{3}{4}$ Gallons of Oil cost \$35.55 $\frac{1}{8}$ cts., What will $64\frac{1}{2}$ Gallons come to?

Ans. \$38.37 $\frac{3}{8}$ cts.

A flour merchant bought of a cooper 70 Flour Barrels, at 60 cts. each, and was to pay him as follows: $57\frac{3}{4}$ yards of Flannel at $62\frac{1}{2}$ cts. per yard, and the balance in money. How much money did he pay?

Ans. \$6.90 $\frac{5}{8}$ cts.

If $57\frac{3}{4}$ lbs. of Sole Leather at $58\frac{1}{2}$ cts. per lb. cost \$33.78 $\frac{3}{8}$ cts., What will $69\frac{1}{2}$ lbs. come to, at $57\frac{3}{4}$ cts. per lb.?

Ans. \$40.13 $\frac{5}{8}$ cts.

Bought $194\frac{3}{4}$ lbs. of Cheese, at $12\frac{1}{2}$ cts. per lb. and sold it again immediately at $11\frac{3}{4}$ cts. per lb. what did I lose by the transaction?

Ans. lost \$1.46 $\frac{1}{8}$ cts.

What is the difference between a half dozen dozen and six dozen dozen?

Ans. 792.

THE SQUARE ROOT.

The square root of a number, is the product arising from that number being multiplied into itself. Extraction of the square root, is the finding of such a number, as being multiplied by itself, will produce the number proposed, or in other words, it is finding the length of one side of a square.

RULE.—1. Separate the given number into periods of two figures each beginning at the units' place. 2. Find the greatest Square contained in the left hand period, and set its root on the right of the given number; subtract said square from the left hand period, and to the Remainder, bring down the next period for a Dividual. 3. Double the ascertained Root for a Divisor and try how often this Divisor, (with the figure used in the trial thereto annexed) is contained in the Dividual; set down the number of times in the root, then multiply and subtract as in Division, and bring down the next period to the Remainder for a new Dividual. 4. Double the ascertained Root for a new Divisor, and proceed as before, till all the periods have been brought down.

PROOF.—Square the Root, adding in the remainder, (if any), and the result will equal the given number.

EXAMPLE.—There is a certain square plot of ground, containing, 4840 square yards; what is its length each way?

Ans. 69,57 square yards.

Operation.
48,40(69,57 Ans. sq. yds.

151 remainder.
<u>4840,0000</u>

There is a certain square Orchard, containing 729 fruit trees; now many are there in a row, each way? Ans. 27.

What is the Square Root of 729, of $756\frac{1}{4}$, of $742\frac{9}{16}$, &c., &c.

What is the Square Root of 3844, $3660\frac{1}{4}$, $3906\frac{1}{4}$, 6724, 6561, $9555\frac{1}{16}$, of 10000, &c., &c. (See pages 93, 181, 209, 220, &c., &c.)

NOTE.—Every part of this work abounds in Examples of the above nature, which the student can vary at pleasure.

DISCOUNT.

DISCOUNT is an abatement of so much Money from any sum to be received before it is due, as the remainder would gain, if put to Interest for the given time, at the given rate per cent.

RULE.—Divide the given sum or debt by the amount of one Dollar, for the given time, at the given rate per cent., the Quotient will be the present worth, which Subtract from the given sum, or debt, and the remainder will be the Discount.

EXAMPLES.

What is the present worth of \$125, due in three months, and Discount of the same for the same time, at 6 per cent. ?

Ans. \$123,15 $\frac{66}{100}$.

$$\begin{array}{r} \$1 \\ 3 \\ \hline 2)3 \\ \hline 1\frac{1}{2} \text{ cts.} \\ 100 \\ \hline \$1,01\frac{1}{2} \text{ cts.} \end{array}$$

$$\begin{array}{r} 1,01\frac{1}{2})125,00 \text{ Dollars.} \\ 2 \quad 2 \\ \hline 203)250,00(123,15\frac{66}{100} \\ \hline 203 \\ \hline 470 \\ 406 \\ \hline 640 \\ 609 \\ \hline 310 \\ 203 \\ \hline 1070 \\ 1015 \\ \hline 55 \\ \hline 203 \end{array}$$

Given Debt \$125,00
Present Worth 123,15
Discount 1,85 cts.

What is the Discount of \$720 for 8 months, at 10 per cent. Ans. \$45.

What is the present worth of \$75, due in 3 months and 15 days, Discounting at 12 $\frac{1}{2}$ per cent. Ans. \$ ts.

NOTE.—When the Discount is considered without regard to time, it is found precisely as the interest for one year.

EQUATION OF PAYMENTS.

EQUATION is used to find the mean time of several payment, due at different times.

RULE.—Multiply each payment by the time, and the sum of these several products Divided by the sum of the payments, will be the Answer.

EXAMPLES.

A owes B \$600, of which \$200 are to be paid at 4 Months, \$200 at 8 Months, and \$200 at 12 Months; but they have agreed that the whole shall be paid at one time; when must it be paid ?

Ans. 8 Months.

$$\begin{array}{r} 200 \times 4 = 800 \\ 200 \times 8 = 1600 \\ 200 \times 12 = 2400 \\ \hline 600 \quad 6,00)48,00 \end{array}$$

Ans. 8 mths.

A man has owing to him \$1000, to be paid as follows: \$500 at 8 Months, and the balance at 16 Months; but it is agreed that both payments shall be made at the same time; when must they be made ?

Ans. at 12 Months.

PRACTICAL QUESTIONS.

Bought a Farm lying in the Mississippi Valley, containing $62\frac{3}{4}$ Acres of rich, fertile Land, in a high state of cultivation, for which I gave $\$70.69\frac{3}{4}$ cts. per Acre, What does it amount to?

Ans. $\$4436.26\frac{1}{8}$ cts.

Bought a cart-load of Sweet Potatoes, containing $67\frac{1}{2}$ Bushels, for $\$43.53\frac{3}{4}$ cts., What were they per Bushel?

Ans. $64\frac{1}{4}$ cts.

PRACTICAL EXERCISES FOR THE SLATE.

If I buy $168\frac{3}{4}$ yds. of Silk Vesting, at $65\frac{1}{2}$ cts. per yard, and sell $66\frac{1}{4}$ yards at $67\frac{1}{2}$ cents per yard, $90\frac{3}{4}$ yards at $62\frac{3}{4}$ cts. per yard, and the rest at $43\frac{3}{4}$ cts. per yard, whether will I gain or loose, and how much?

Ans. gained $\$3.30\frac{7}{16}$ cts.

What will $469\frac{3}{4}$ lbs. of Gun Powder come to at $66\frac{1}{2}$ cts. per lb.?

Ans. $312.38\frac{3}{8}$ cts.

What will $\frac{3}{4}$ of a yard of Riband cost, at $\frac{5}{8}$ of a cent per yard?

Ans. $46\frac{7}{8}$ mills.

What cost a cargo of Wheat, containing 6750 bushels, at $68\frac{3}{4}$ cts. per bushel?

Ans. $\$4640.62\frac{1}{2}$ cts.

Bought a lot of Books, containing in number 794, at $64\frac{1}{2}$ cts. each, what did they amount to?

Ans. $\$512.13$ cts.

Bought $137\frac{3}{4}$ gallons Cider, at $18\frac{3}{4}$ cts. per gallon, what does it amount to?

Ans. $\$25.82\frac{13}{16}$ cts.

What is the square of 67?

Ans. 4489.

DISCOUNT.

DISCOUNT is an abatement of so much Money from any sum to be received before it is due, as the remainder would gain, if put to Interest for the given time, at the given rate per cent.

RULE.—Divide the given sum or debt by the amount of one Dollar, for the given time, at the given rate per cent., the Quotient will be the present worth, which Subtract from the given sum, or debt, and the remainder will be the Discount.

EXAMPLES.

What is the present worth of \$125, due in three months, and Discount of the same for the same time, at 6 per cent. ?

Ans. \$123,15 $\frac{55}{100}$.

$$\begin{array}{r} \$1 \\ 3 \\ \hline 2)3 \\ \hline 1\frac{1}{2} \text{ cts.} \\ 100 \\ \hline \$1,01\frac{1}{2} \text{ cts.} \end{array}$$

$$\begin{array}{r} 1,01\frac{1}{2})125,00 \text{ Dollars.} \\ 2 \quad 2 \\ \hline 203 \quad 250,00(123,15\frac{55}{100} \\ 203 \\ \hline 470 \\ 406 \\ \hline 640 \\ 609 \\ \hline 310 \\ 203 \\ \hline 1070 \\ 1015 \\ \hline 55 \\ \hline 100 \end{array}$$

$$\begin{array}{r} \text{Given Debt } \$125,00 \\ \text{Present Worth } 123,15 \\ \hline \text{Discount } 1,85 \text{ cts.} \end{array}$$

What is the Discount of \$720 for 8 months, at 10 per cent. Ans. \$45.

What is the present worth of \$75, due in 3 months and 15 days, Discounting at 12 $\frac{1}{2}$ per cent. Ans. \$ ts.

NOTE.—When the Discount is considered without regard to time, it is found precisely as the interest for one year.

EQUATION OF PAYMENTS.

EQUATION is used to find the mean time of several payment, due at different times.

RULE.—Multiply each payment by the time, and the sum of these several products Divided by the sum of the payments, will be the Answer.

EXAMPLES.

A owes B \$600, of which \$200 are to be paid at 4 Months, \$200 at 8 Months, and \$200 at 12 Months; but they have agreed that the whole shall be paid at one time; when must it be paid ?

Ans. 8 Months.

$$\begin{array}{r} 200 \times 4 = 800 \\ 200 \times 8 = 1600 \\ 200 \times 12 = 2400 \\ \hline 600 \quad 6,00)48,00 \end{array}$$

Ans. 8 mths.

A man has owing to him \$1000, to be paid as follows: \$500 at 8 Months, and the balance at 16 Months; but it is agreed that both payments shall be made at the same time; when must they be made ?

Ans. at 12 Months.

PRACTICAL QUESTIONS.

Bought a Farm lying in the Missis-
sippi Valley, containing $62\frac{3}{4}$ Acres of
rich, fertile Land, in a high state of cul-
tivation, for which I gave $\$70.69\frac{3}{4}$ cts.
per Acre, What does it amount to ?
Ans. $\$4436.26\frac{1}{2}$ cts.

Bought a cart-load of Sweet Potatoes,
containing $67\frac{1}{2}$ Bushels, for $\$43.53\frac{3}{4}$ cts.,
What were they per Bushel ?
Ans. $64\frac{1}{2}$ cts.

PRACTICAL EXERCISES FOR THE SLATE.

If I buy $168\frac{3}{4}$ yds. of Silk Vesting, at $65\frac{1}{4}$ cts. per yard, and sell $66\frac{1}{4}$ yards at $67\frac{1}{4}$ cents per yard, $90\frac{3}{4}$ yards at $62\frac{3}{4}$ cts. per yard, and the rest at $43\frac{3}{4}$ cts. per yard, whether will I gain or loose, and how much?

Ans. gained $\$330\frac{7}{16}$ cts.

What will $469\frac{3}{4}$ lbs. of Gun Powder come to at $66\frac{1}{4}$ cts. per lb.?

Ans. $312.38\frac{3}{4}$ cts.

What will $\frac{3}{4}$ of a yard of Riband cost, at $\frac{2}{3}$ of a cent per yard?

Ans. $46\frac{2}{3}$ mills.

What cost a cargo of Wheat, containing 6750 bushels, at $68\frac{3}{4}$ cts. per bushel?

Ans. $\$4640.62\frac{1}{2}$ cts.

Bought a lot of Books, containing in number 794, at $64\frac{1}{2}$ cts. each, what did they amount to?

Ans. $\$512.13$ cts.

Bought $137\frac{3}{4}$ gallons Cider, at $18\frac{3}{4}$ cts. per gallon, what does it amount to?

Ans. $\$25.82\frac{1}{8}$ cts.

What is the square of $67\frac{1}{2}$?

Ans. 4489.

MENSURATION, OR MEASUREMENT.

This Rule is employed in measuring Mason's and Carpenter's work, plastering, paving, and painting; also, for measuring timber in all its forms, and for estimating quantity in length, superficies, and solids, whenever yards, feet, and inches are used.

A square is anything that is equal in length and breadth, having four equal sides, and four equal angles. To ascertain the size, or rather the superficial contents of a square, in yards, feet, inches, &c., Multiply the length by the breadth.

A square (as used by Mechanics, in estimating flooring, roofing, weather-boarding, &c.,) is 10 feet long, 10 feet wide, or 100 square feet.

NOTE.—To reduce square feet to square yards, Divide by 9.

How many squares of weather-boarding on the side of a house that is 38 feet 6 inches in length, and 18 feet 3 inches high?

ft. in.
38 6 in length.
12
<u>462</u>

<u>3850</u>
702,6250=½

NOTE.—To measure a Triangle, Multiply the base by one-half the perpendicular height, and the product will be its superficial contents.

Let C P and T represent a Triangle, whose base is 40 feet, and perpendicular height 24 feet; how many square feet does it contain?

Length 40 feet.
12 half the perpendic.
Ans. 480

In the gable end of a house, which is 40 feet broad, and 22 feet high, from the square of the building to the top; how many squares?

Ans. 4 squares and 40 feet.

40
22

80
80

880 ft.
Proof.

40
11 hf. hg.

4,40 feet

NOTE.—To find the circumference of a Circle when the Diameter is given:

RULE.—Multiply the Diameter by $3\frac{1}{7}$; to find the Diameter when the Circumference is given, divide the Circumference by $3\frac{1}{7}$.

EXAMPLE.—The Diameter of a circle is 21 feet; what is the Circumference?
Ans 66 feet.

$\frac{1}{7}$) 21 feet Diameter.
3 $\frac{1}{7}$

63
3

66 feet.

NOTE.—To find the superficial contents of a circle, Multiply half the Circumference by half the Diameter.

How many square feet in a Circle, whose Diameter is 14 feet, and Circumference 44?
Ans. 154 feet.

NOTE.—To find the superficial contents of a Globe, Multiply the Circumference by the Diameter.

half the Circum. 22
half the Diam. 7

154

What are the superficial contents of a Globe, the Diameter of which is 14 feet, and circumference 22?

Ans. 308 square feet.

What is the hypotenuse of a right angled triangle, whose base is 20 feet, and perpendicular 22?

(See square root.) Ans. 29,73.

FORM OF A DAY BOOK.

WILLIAM W. SMITH, *Lexington, Ky., Jan. 1st, 1844.*

See Leg'r. Page	CHARLES S. MORGAN, JR.	Dr.	\$	Cts.
215+	To 350 lbs. Coffee, at $18\frac{3}{4}$ cts. per lb.	- - \$65.62 $\frac{1}{2}$		
	" 225 " Sugar " $9\frac{1}{2}$ " " - - 21.37 $\frac{1}{2}$			
	" 74 $\frac{3}{4}$ " Cheese, $15\frac{1}{2}$ " " - - 11.58 $\frac{3}{4}$			
		Cr.	98	58 $\frac{3}{4}$
215+	By 1 hhd. Tobacco, neat 1750 lbs. at $3\frac{3}{4}$ cts. per lb.	\$65.62 $\frac{1}{2}$		
	" Cash to Balance, - - - - 32.96 $\frac{1}{2}$		98	58 $\frac{3}{4}$
		9		
	JAMES S. HAWKINS, SEN.,	Dr.	\$	Cts.
215+	To $17\frac{1}{2}$ yds. Flannel, at $62\frac{1}{2}$ cts. per yard, -	\$10.93 $\frac{3}{8}$		
	" $13\frac{3}{4}$ lbs. Coffee, " $18\frac{3}{4}$ " lb. -	2.57 $\frac{1}{8}$		
	1 Coffee Pot, " $68\frac{3}{4}$ " -	68 $\frac{3}{4}$		
	1 set Tea spoons, \$2.87 $\frac{1}{8}$ " -	2.87 $\frac{1}{8}$		
		Cr.	17	07 $\frac{1}{8}$
215+	By $14\frac{3}{4}$ bushels Flax seed, at $43\frac{1}{2}$ cts. per bush.	\$6.41 $\frac{3}{8}$		
	" Cash Note on Seth Simple, - - -	6.43 $\frac{5}{8}$		
	" Individual Note, to Balance, - - -	4.22 $\frac{9}{16}$	17	07 $\frac{1}{8}$
		17		
	ISAAC L. SIMPSON,	Dr.	\$	Cts.
215+	To $17\frac{3}{4}$ lbs. Wool Rolls, at $62\frac{1}{2}$ cts. per lb. -	\$11.09 $\frac{3}{8}$		
	" $7\frac{1}{2}$ ozs. Indigo, " $19\frac{3}{4}$ " oz. -	1.48 $\frac{1}{2}$		
	" $7\frac{1}{2}$ " Madder, " $6\frac{1}{2}$ " " -	46 $\frac{7}{8}$		
		Cr.	13	04 $\frac{1}{8}$
215+	By $23\frac{1}{2}$ bushels Corn meal, at $43\frac{3}{4}$ cts. per bush.	\$10.28 $\frac{1}{2}$		
	" Cash to Balance, - - - - 2.76 $\frac{1}{2}$		13	04 $\frac{1}{2}$

What is the Interest on \$70, for three years three months three weeks and five days, at the rate of 6 per cent. per annum?

Ans. \$13.95 $\frac{1}{2}$ cts.

What is the Interest of \$30.75 cents, for seventeen days, at 6 per cent. ?

Ans. 8 $\frac{5}{8}$ cts.

What is the Interest of \$350, for seven days, at the rate of 7 per cent. per annum?

Ans. 47 $\frac{5}{8}$ cts.

What is the Interest of \$470, for 3 days, at the rate of 6 per cent. per annum?

Ans. 23 $\frac{1}{2}$ cts.

PROMISCUOUS EXAMPLES—*Continued.*

Bought a lot of Manufactured Tobacco, containing 2750 lbs neat, at $22\frac{3}{4}$ cts. per lb., and sold 2100 lbs. again at $24\frac{1}{2}$ cts. per lb., and the balance at $19\frac{3}{4}$ cts. per lb., Whether do I gain or loose, and how much?

Ans. gain \$17.25 cts.

Sold a lot of Cheese, containing 6 in number, weighing $13\frac{3}{4}$ lbs. each, at $18\frac{3}{4}$ cts. per lb., What do they amount to?

Ans. \$15.46 $\frac{7}{8}$ cts.

What is the Premium for Insuring a cargo of Dry Goods, valued at \$9550, at $15\frac{1}{4}$ per cent.?

Ans. \$1504.12 $\frac{1}{2}$ cts.

PROMISCUOUS EXAMPLES—Continued.

If 96 pairs of Ladies' Shoes, cost \$93.60 cts., What will be the cost of 1 pair, at the same rate?

Ans. $97\frac{1}{2}$ cts.

What will $199\frac{3}{4}$ bushels of Corn come to, at $95\frac{1}{4}$ cts. per bushel?

Ans. \$190.26 $\frac{3}{4}$ cts.

What is the Premium for Insuring a cargo of Sugar at sea, valued at \$7875, at $13\frac{1}{2}$ per cent.?

Ans. \$1082.81 $\frac{1}{2}$ cts.

What will $1\frac{1}{2}$ yards of Tape cost, at three-fourths of a cent per yard?

Ans. $1\frac{1}{4}$ cts.

What is the Interest on \$600, for two years, three months and thirteen days, at the rate of 6 per cent per annum?

Ans. \$82.30 cts.

What will 9 hhds. of Tobacco cost, the neat weight of each being 1350 lbs., at $5\frac{1}{2}$ cts. per lb.

Ans. 698.62 $\frac{1}{2}$ cts.

If $99\frac{3}{4}$ yds. of Jean, cost \$99.50 $\frac{1}{4}$ cts., What will $98\frac{1}{2}$ yds. come to, at the same rate?

Ans. 98.25 $\frac{3}{4}$ cts.

What is the Insurance on \$10000 worth of Property, at $98\frac{3}{4}$ per cent.?

Ans. \$9875.

A PRACTICAL SYSTEM
OF
BOOK-KEEPING,
FOR
FARMERS, MECHANICS, AND RETAILERS.

BOOK-KEEPING is the method of recording a systematic account of business transactions. It is of two kinds—Single and Double Entry. The former only will be noticed in this Work, on account of the simplicity of Single Entry, it is, perhaps the best that can be recommended to Farmers, Mechanics, and Retailers.

As many of those worthy Gentlemen engaged in the above occupations, have generally a system of their own chalked out which is peculiar to itself; and if they have reference to a treatise on Book-keeping at all, they are apt to prefer something that will curtail the labor of writing as much as possible. Consequently, in view of the preferences of our worthy Patrons we will dispense with the Journal, and present in this system only the Ledger, the Day Book, and one auxiliary book, the Cash Book.

In making an entry on your Day Book, it is always proper that you give the date on which the transaction, took place; the name of the thing, or representative, given or taken in exchange; the conditions, if any, that are stipulated in the bargain made; the name of the person with whom the bargain was made, or who may be concerned in it; and the amount. These are all the essentials of an entry. As it would be impossible to give an exact form for every entry that may or might chance to occur, in the course of your business, we submit only the following, which you will observe have been regularly posted up, from the Day Book to the Ledger.

THE DAY BOOK

This Book exhibits a minute history of business transactions in the order of time in which they occur, with every circumstance, necessary, to render the transactions plain and intelligible.

It is ruled with a column on the left hand, for the date, and three columns on the right, the first, for the folio or page of the Ledger, to which the account is transferred; and the last two for Dollars and Cents.

Russellville, January 1st, 1848.

THE LEDGER.

This Book is used for the purpose of collecting the scattered accounts of the Day Book, and arranging all that relates to each individual into one separate statement. The business of transferring the accounts from the Day Book, to the Ledger, is called Posting.

The Ledger is ruled with a Double line in the middle of the page, to separate the debits from the credits. Each side, or half, of the page has two columns for Dollars and Cents, one for pointing out the page of the Day Book, from which the particular item is brought, and a column on the left for the dates.

When an account is posted, the page of the Ledger on which this account is kept, is written in the column for that purpose in the Day Book; and also, the page of the Day Book from which the account was posted, is written in the second column of the Ledger.

In posting, begin with the first account in the Day Book, which you will perceive is William Anderson. Enter his name on the first Page in the Ledger, in a large fair hand, with *Dr.* on the left and *Cr.* on the right. As there are several articles charged to William Anderson, on the 1st of January, instead of specifying each article, we say, "for Sundries," and enter the amount, in the proper columns. See Ledger, page 1st.

The Ledger has an Index, or Alphabet, in which the names of persons are arranged under their initial letters, with the figures pointing out the page in the Ledger, where the account may be found.

NOTE.—This account exhibits the exact state of your Books. It is taken from the preceding accounts in the Ledger. The Debtor side is an exhibit of the amounts due to you by others, and the Credit side, the amounts due by you to others. It is not strictly necessary, that this account should be introduced in the Ledger, in Single entry. It will be found convenient, however, to balance the Book at stated intervals, and transfer the Balance to the new accounts below, as in the preceding Ledger; and when that is done, a Balance sheet like the above, will be found convenient, as presenting at one view, the exact state of your Ledger.

REMARKS.

The Student will recollect that the *Dr.* on the left hand side of the page (in the Ledger) signifies Debtor, and that the sums entered on that side of the page, are those for articles sold to others, and for which they are indebted. The *Cr.* on the right hand side, signifies Credit, or that the sums entered on that side, are for articles received of the person under whose account they stand, and for which they are to be credited. See account of James Perkins on Ledger, page 4. The Debtor side of this account shows the amount of articles Mr. Perkins has received of me, and the Credit side shows what I have received of him. It appears that the total amount of my account against him, is \$3 40; subtract this from the \$11.71½, which stands to his Credit, on the right of the account, and there will remain a Balance of \$8.31½ due him.

See the account of F. A. Hill, page 4th. This account presents equal sums on both sides. Hence it is evident that I owe F. A. Hill nothing, and that he owes me nothing. The account is fully closed.

NOTE.—When an account is settled only, and not fully paid, as in that of G. W. Beasley, (Ledger, page 3), and several of the preceding accounts, the Balance, whether it be in your favor, or against you, is brought down and placed distinctly by itself, and serves for the beginning of a new account, as you perceive has been done, in the above example, the balance being \$78.64½.

CASH BOOK.

The Cash Book is used to record the daily receipts and payments, of Money. It is ruled off nearly after the same manner of the Ledger. The Debtor side exhibits the amount of money received, and the Credit side shows the amount paid out. Subtract the sum of the *Cr.* from that of the *Dr.*, and the balance *will always be equal to the cash on hand.*

EXAMPLE.—How many days from the 2d of April to the 2d of September? Look for April at the left hand and September at the top; in the table is 153.

THE
PRACTICAL INTEREST CALCULATOR:
OR,
BOOK OF INTEREST;

SHOWING THE SIMPLE INTEREST (READY CALCULATED), ON ANY NUMBER
OF DOLLARS, FROM \$1 TO \$1000, INCLUSIVE,

AT THE RATE OF

6, 7, 8, 10, and $12\frac{1}{2}$ Per Cent.,

FOR ANY LENGTH OF TIME, FROM 1 DAY TO 3 YEARS (MORE OR LESS.)

BY WILLIAM B. YOUNG,

(OF LOGAN COUNTY, KY.)

AUTHOR OF THE ARITHMETICAL DICTIONARY, OR BOOK OF REFERENCE.

CINCINNATI:

PUBLISHED FOR THE AUTHOR, BY E. MORGAN & CO.,

NO. 111 MAIN STREET.

1850.

EXPLANATORY REMARKS, ETC.

It is believed by the Author, that very little explanation will be necessary to show either the practical utility or the manner of using "The Practical Interest Calculator; or, Book of Interest." Such is the extreme simplicity of the arrangement of the Tables composing it, that the principle will be readily comprehended by a mere glance of the eye across the pages. However, as it will be expected by some, and perhaps desired by others, that there should be something said relative to this matter, we beg leave, by way of calling the reader's attention to the most prominent features of the arrangement, to introduce, and detail, at some length, the outlines of a conversation said to have taken place between a Book Agent and Mr. Zachariah Snooks, of backwoods notoriety. The place where, and the time when, we will pass over, at least for the present. * It was about as follows:

Agent.—Good morning, Mr. Snooks, how do you do, sir? Have you seen the new Practical Interest Calculator, showing the interest on money ready calculated?

Snooks.—No I have not; I did not even know that there was such a thing. Have you seen it?

A.—Yes, here it is—YOUNG'S INTEREST CALCULATOR, showing interest at 6, 7, 8, 10, and 12½ per cent.

S.—Exactly, exactly. Well, now, I tell you what, Mr. Book Agent, that thing will take, sir, if—

A.—If what, Mr. Snooks? Speak it out—let it come—there are no secrets about this thing; it was made to sell, sir; and I am here with a few more left.

S.—Exactly; with a few more left of the same sort, as the razor-strop man said. Well, what I was going to remark, is this: If the thing can be so explained as to render it intelligible to the comprehension of every man, or to men in general, it will take like hot cakes at a tavern. My reasons for thinking so, Mr. Agent, are these: almost every man has something to do in the way of calculating interest, and that, too, at the different rates of per cent., notwithstanding the law has fixed the rate of interest, in many of the States of the Union, at 6 per cent., there are to be found but comparatively few law-abiding men in this particular. Men consider their money as other property, and use it in such a manner as to make the most of it—10, 12½, and even 15 per cent., is the order of the day. But I am detaining you, Mr. Agent; I want you to show me the hang of your book, and I am in. Tell me the interest on—

A.—Hold, Mr. Snooks; let us first examine the outlines, or leading features of the system, before we descend to particulars; after which, I doubt not but that every part of the system will appear to your satisfaction.

S.—Exactly, exactly; that is sensible talk. Although I am a backwoods country clodhopper, Mr. Agent, I would like to be considered a systematic man; and though rough in my external appearance, the *man* is here.

A.—I doubt it not, Mr. Snooks; we often find the most worthy men clad in the humblest

manner. By way of illustrating the use and manner of using these tables, we will proceed in the first place, to notice this left hand perpendicular column, set in large full-faced type commencing at the head of the column, with the numbers 1, 2, 3, &c., and closing at the foot with 1080. We will just remark here, that this column is uniformly the same throughout the book; and the numbers composing it, you will recollect, may be used respectively (with equal propriety), to represent either dollars or days.

S.—Exactly. I think I will recollect that; but what is meant by these scattering numbers, 1, 2, 3, 4, &c., on the left of this column you have just described?

A.—Hold, Mr. Snooks: however, in reference to these numbers, I will just say, that they represent a division of the opposite column into different periods of time, as years, months, &c.

S.—Exactly. I have the hang of that, too; but—

A.—Hold, again, Mr. Snooks; let us proceed to notice, in the next place, those numbers at the head of each page, labeled, Time, or Money, Dollars or Days. These, you observe commence with 2 on page 7, and increase 1 on every succeeding page, from 1 to 30 then you observe the increase on each succeeding page (for 6 pages) is an additional 30 (corresponding with the number of days in a month); and thence 360, to the end. These numbers, thus brought to view above, may, in like manner, be used to represent either dollars or days.

S.—(Turning over the pages.)—Exactly, exactly. I think I have got the hang of that too; but here is another little matter, Mr. Agent, that I wish you to explain: What is meant by those large figures, 6, 7, 8, 10, and $12\frac{1}{2}$, across the top, or near the top, of each page? this little matter looks as if it might be easily understood, but I can't come to it quite

A.—You observe, Mr. Snooks, that these numbers stand at the head of five separate columns composing the body of the work; they point out the interest in the column below, respectively, from 6, to $12\frac{1}{2}$ per cent.

S.—Exactly, exactly; that is the best thing yet. Well now, Mr. Agent, I think I have the hang of your book. Hold on, and let me explain: we first find the principal, or number of dollars, in the left hand perpendicular column; the time for which you wish the interest, you find above; then, opposite the one, and under the other, we find the answer

A.—Exactly (if you will allow me the use of your favorite expression). Turn to page (11) opposite 180, on the left, and under 10; you see the interest, ready calculated, at 7, 8, 10, and $12\frac{1}{2}$ per cent., as follows: 30 cents at 6 per cent., 35 at 7, 40 at 8, &c.

S.—Exactly; I think I understand that, too; but I think you said that it would work any way. I mean—

A.—Hold, Mr. Snooks, I think I can guess at your meaning: you wish to know, we were to reverse the above example, say, required the interest on \$10 for 180 days (months), whether the result would be the same. You see it is the same, identically, the different rates of per cent.

S.—Exactly. I am satisfied that it will work both ways; but there is another little matter just here, that I wish you to explain: Suppose I wished to know the interest on some amount of money, or number of dollars, for 10 days, that is not here represented, say \$120, if

example.—Hold; I see that number is here. \$240—Hold; I see that is here, too. Well let me see—two hundred and—

A.—Hold, again, Mr. Snooks; I think I can help you out: you wish to know how you would proceed to obtain the interest, were the exact number of dollars not represented in this left hand perpendicular column.

S.—Exactly. That is what I am trying to get at.

A.—I am glad, Mr. Snooks, that you have called my attention to this little matter, as it will afford me an opportunity of illustrating this point at some length; and I doubt not but that I shall be able to explain it to your entire satisfaction. You will recollect, if the exact number of dollars is not brought to view, you can obtain the answer thus: first find the interest, at the given per cent., on some one number that is represented here, and then select the number that supplies the deficiency between this and the number sought; then find the interest (at the required per cent.) in like manner, and add for the answer. For example: let us suppose that the number 360 was absent, and the interest was required on that amount for 10 days, at 6 per cent., at 7 per cent., at 8 per cent., at 10 per cent., and at $12\frac{1}{2}$ per cent.; here we might begin to pack up the number thus:—360 at 6 per cent.; 300 gives 50 cents, and 60 gives 10—50 and 10 make 60, the answer; at 7 per cent., 330 gives 64 cents, and 30 gives 6—64 and 6 make 70, the answer; again at 8 per cent. (on the same amount), 240 gives 53 cents, and 120 gives 27—53 and 27 make 80, the answer; and so of the rest. You will observe, also, Mr. Snooks, that the correctness of any assumed position can be readily tested, by adding some two or three select numbers together. We have selected the above examples, not because they are more convenient than any others (of the thousands that might have been selected), but because they are as much so; the interest on any other amount may be obtained after the same manner. We will just here remark, that there will sometimes appear a few slight discrepancies in these calculations, when comparing them with one another, and by actual calculation, these arise out of the omission of fractions. Be not alarmed, however, these have been so balanced up as to make the gain or loss a mere trifle; never more than $1\frac{1}{4}$ cents.

S.—Exactly. Is that all—one cent and a quarter. Well, that is very trifling, and would hardly be noticed.

A.—It is true, Mr. Snooks, it is the remotest trifle, of itself; but persons noticing it, and not knowing how to account for it, might magnify it into a very formidable mistake or error, in calculating, when, in fact, it is no error at all, but simply arises from the omission of a number of small fractions that would rarely be counted by the most penurious money-monger.

S.—Exactly. I think so too; but, see here, Mr. Agent, there is one more little matter just here that I wish you to explain—I had like to have forgotten it. Cents, you know, are little dollars, when standing alone. Say, for example, that I wished to know the interest on forty, fifty, or any other number of cents, less than one dollar, could I find it by your Interest Calculator?

A.—Most assuredly, Mr. Snooks, you can find the interest on any number of cents precisely in the same manner that you would find it on any number of dollars. You must bear

in mind that the interest on any number of cents, will be but a trifle, unless the amount stands over for some considerable time. It will, however, show itself in cents, mills, tenths of a mill, hundredths of a mill, &c., from the beginning. We will present you with a few examples, and a few general remarks, from which you will be able to determine the correct interest on any number of cents, and define your position in reference to the same: you observe, by turning to any and every page in the system, that the interest on one dollar, at the different rates of per cent., is labeled mills, cents, &c. From this alone, you would be able to define your position; for a moment's reflection will teach you that, if the interest on one dollar for 12 months, at 6 per cent., be 6 cents, the interest on \$10 be 60 cents, and the interest on \$100 be 6 dollars, it is evident, according to the same principle, that the interest on 50 cents, for the same time, is 3 cents; and that the interest on 40 cents, for the same reason, is 2 cents and $\frac{1}{5}$ ($\frac{1}{5}$), or 4 mills. With these remarks, Mr. Snooks, we will submit the work, not, however, without calling your attention to the beauty of the decimal currency, as here exhibited, in which 10 mills make one cent, 10 cents make 1 dime, 10 dimes make 1 dollar, &c.

S.—Exactly, exactly. I think, Mr. Agent, I have the hang of your book. I have detained you some time, and you have answered all my questions in a satisfactory manner. There is another little matter that I thought I would name—it is rather a criticism on the size of your book—it is not large enough for the price. I can get books that are three times as large for less money.

A.—As to that matter, Mr. Snooks, men will think differently. I am persuaded that most men would prefer the simplicity and convenience of the arrangement of the matter to the size of the book. The more simplified, the more desired.

S.—Exactly. I give it up. I had thought that if any thing is good, the more of it the better; but I stand corrected. Just hold on, Mr. Agent, and let me ask one question more. In what time will money double itself at six per cent., and in what time at—

A.—Hold again, Mr. Snooks, I think I understand you. You wish to know in what time a sum of money will yield an interest profit that will equal the principal, at the different rates of per cent. noticed above.

S.—Exactly—that is it, sir; answer me that question, and I am 'o-p-h,' (as the cork said to the ginger-pop).

A.—We will try and answer this to your satisfaction. Money, at six per cent., Mr. Snooks, will yield an interest profit that will equal the *principal* in 16 years and 8 months. At 7 per cent., in 14 years, 3 months, and 13 days, nearly. At 8 per cent., in 12 years and 6 months. At 10 per cent., in 10 years; and at $12\frac{1}{2}$ per cent. money will double itself in 8 years.

S.—(Throwing up the whites of his eyes), what! in eight years! you astonish me! Well, I tell you what it is, Mr. Agent, if I can get out of that little *snap* with Uncle Ned and Cousin Zip Spooner, I think I will not borrow any more money at $12\frac{1}{2}$ per cent. soon again. But—but—I promised to be off. Success to you, Mr. Agent. I want a copy of your book, and here is the ginger.

Thank you, sir.—Exit Snooks.

We ask the reader's pardon for detaining him so long in detailing the above conversation. Mr. Snooks is remarkably inquisitive, and we have endeavored to answer his inquiries in that manner which we conceived to be best calculated to illustrate the manner of using the Practical Interest Calculator. We have been a little more tedious than we otherwise should have been, owing to the small amount of reading matter contained in the volume.

Mr. Snooks, with all his inquisitiveness, has failed to ask one question which will be asked a thousand times (more or less), it is this: are these calculations correct? (Sensible question.) We will here take the liberty to answer this in the affirmative. My humble opinion is, that they are true, to a cent. To attain this desirable end, the calculations were all made (penned) and laid aside, after which there was a second set prepared, independent of the former. The two sets were then contrasted, and the discrepancies noted. The manuscript was then carefully revised for the press—omitting the fractions, (as above remarked)—the proofs were carefully read at the office, after which they were compared with the original, and revised by the author at his room. And yet, (you will say), there might be a mistake. It is admitted; but, if so, it has eluded our most anxious vigilance.

The work, in conclusion, humble in style and unpretending in dress, is respectfully submitted to the patronage of a generous and discriminating public.

THE AUTHOR.

Near Russellville, Ky.

REMARKS.

In reference to the above Index, we will just remark, that as it would be impossible to make a reference to the almost countless number of questions that will come up in the calculation of Interest, we have only noticed those numbers representing dollars or days, (placed at the head of the pages, respectively). When these numbers are used to represent dollars, any period of *time* that may (probably) be desired can be found on the same page, and when used to represent days, any number of dollars may be found as above.

You observe a column, or rather two columns, of figures on the left, commencing 1, 2, 3, etc., (having a downward increase), and corresponding with the numbers representing the heads of the pages throughout the work; opposite these, (on the right), you observe another column, pointing out the folios, or *pages*, on which the opposite numbers may be found, which numbers, you will recollect, may be used to represent either *dollars* or *days*, as above remarked. Example: Required the interest on 16 dollars, for 90 days (more or less), see page 14. Required the interest on 90 dollars, for 16 days (more or less), see the same reference; so of the rest.

FORM OF A WILL,

With the Devise of a Real Estate, Leasehold, &c.

The last WILL and TESTAMENT of L. D. W., of _____

I, L. D. W., considering the uncertainty of this mortal life, and being of sound mind and memory, do make and publish this my last Will and Testament, in manner and form following (that is to say): First, I give and bequeath unto my beloved wife, J. C., the sum of _____
Item, I give and bequeath unto my eldest son, A. C., the sum of _____
Item, I give and bequeath unto my two younger sons, I. C. and F. C., the sum of _____ each; *Item*, I give and bequeath to my daughter-in-law, S. H., widow, the sum of _____; which said several legacies or sums of money I will and order to be paid to the said respective legatees within six months after my decease. I further give and devise to my said eldest son, A. C., his heirs and assigns, all that messuage or tenement, situated lying and being in _____, together with all my other freehold estate whatsoever, to hold to him the said A. C., his heirs and assigns, for ever; and I hereby give and bequeath to my said younger sons, I. C. and F. C., all my leasehold estate, of and in, all those messuages or tenements, with the appurtenances, situate _____, &c., equally to be divided between them. And lastly, as to all the rest, residue, and remainder of my personal estate, goods and chattels, of what kind and nature soever, I give and bequeath the same to my said beloved wife, J. C., whom I hereby appoint sole Executrix of this my last Will and Testament: hereby revoking all former wills by me made. In witness whereof, I have hereunto set my hand and seal, the _____ day of _____ in the year of our Lord one thousand eight hundred and _____.

L. D. W.

The above instrument, consisting of one sheet (or two sheets) was now here subscribed by L. D. W., the testator in the presence of each of us; and was at the same time declared by him to be his last Will and Testament, and we, at his request, sign our names hereto, as attesting witnesses.

J. P. G., residing in the _____

W. H., residing in the _____

A CODICIL TO A WILL,

That is to say, a Supplement or addition to the same.

Whereas, I, L. D. W., of _____ have made my last Will and Testament, in writing, bearing date _____ [and have thereby, &c.]

Now I do by this my writing which I hereby declare to be a codicil to my said will, to be taken as a part thereof, [will and direct, &c. &c.] give and bequeath to my niece M. S., one gold watch one large diamond ring, and one silver coffee pot, And whereas, in and by my last Will and Testament I have given and bequeathed to my daughter-in-law, G. H., the sum of _____ I do hereby order and declare, that my will is, that only the sum of _____ be paid unto her, in full of the said legacy I have as aforesaid given and bequeathed unto her; and that the remaining part of

the said legacy be given and paid to my nephew E. G.; and lastly, it is my desire that this my present codicil be annexed to, and made a part of my last Will and Testament, to all intents and purposes, in witness whereof I have hereunto set my hand and seal, this ____ day of ____ in the year of our Lord Eighteen hundred and ____

L. D. W.

The above instrument of one sheet was, at the date thereof, declared to us by the testator, L. D. W., to be a codicil to be annexed to his last Will and Testament; and he acknowledged to each of us, that he had subscribed the same; and we, at his request, sign our names hereto as attesting witnesses.

J. P. G., residing in the ____

W. H., residing in the ____

A FORM

For Writing an Obligation, Lease of a House, &c.

This Indenture made on the ____ day of ____ 184— between A. B. of the ____ of the first part, and L. D. of the said city, of the second part: Witnesseth, that the said party of the first part hath this day agreed and by these presents doth agree to lease or rent to the said party of the second part, his executors, administrators and assigns, all [that house, farm, tenement, or inclosure), with all and singular its appurtenances, situate standing and being in the ____ ward of the city of ____ known as No. ____ in ____ street in said city, to have and to hold the said premises with the appurtenances, unto the said C. D., his executors, administrators and assigns for the term of ____ years from the day of ____ 184— at the yearly rent or sum of ____ dollars, to be paid in ____ payments, as long as the said premises are in good tenable condition, and it is agreed that if any rent shall be due and unpaid or if default shall be made in any of the covenants herein contained, then it shall be lawful for the said party of the first part, to re-enter the said premises, or to distrain for any rent that may remain due thereon; and the said party of the second part doth hereby covenant to pay the said party of the first part the said ____ rents as herein specified, save and except at all times during the said term (for which the premises shall have been leased) such proportional part of the said rent as shall grow due, during such time as the said house shall without the hindrance of the said party of the second part be, and remain untenable, by reason of accidental fire. And the said C. D., his executors, administrators and assigns, shall and will during the said term, at his own property, costs and charges, well and sufficiently keep in repair the said premises, when and as often as the same shall require (damages by fire only excepted.) And at the expiration of the said term, the said party of the second part will quit and surrender the premises hereby demised in as good state and condition as reasonable use and wear thereof will permit, damages by fire only excepted. And also, that the said party of the second part, his executors, administrators and assigns, shall and will, during the said term pay

and discharge all taxes, assessments, and other charges which shall be taxed, assessed, or charged upon the said premises, or any part thereof. And the said party of the first part doth covenant that the said party of the second part on paying the said — rent, and performing the covenants aforesaid, shall and may peaceably and quietly hold and enjoy the said demised premises for the term or terms so said without any molestation or interruption of the said party of the first part, his heirs, or any other person whatever, claiming, or to claim, by, from, or under him, or them. And also, in case the premises are destroyed by accidental fire, the said party of the first part, his executors, administrators or assigns shall forthwith proceed to rebuild or repair the said premises, and put them in as good condition as they were before the fire, and that until such repairs are made and completed the rent shall cease.

In witness whereof the parties to these presents have hereunto set their hands and seals, the day and date above written.

C. D. (L.S.)

FORM OF A DEED WITH FULL COVENANTS.

Know all men by these presents: That we, A. B., and C. his wife, of the town of — in the county of — for and in consideration of the sum of — to us in hand paid, have granted, bargained, sold, and by these presents do grant, bargain, sell, and convey unto E. F., of the — all that certain parcel of land, situate in the said town of — and described as follows: [here insert boundaries:] with all the appurtenances, and all the right, title, interest, claim and demand of us, or either of us, in the premises; to have and to hold the same, with the appurtenances, unto the said E. F., and his heirs in fee simple, for ever: And I, the said A. B., for myself and my heirs, do hereby covenant and agree to and with the said E. F., and his heirs and assigns, that I am now the owner of said premises, and am seized of a good and indefeasible estate of inheritance therein, and that I have full right and power to sell and convey the same in fee simple, absolute; that the said premises are free and clear of all incumbrances; that the said E. F., his heirs and assigns may for ever hereafter have, hold, possess, and enjoy the same, without any suit, molestation, or interruption, by any person whatever, lawfully claiming any right therein; and that I the said A. B., and all persons hereafter claiming under me, will at any time hereafter, at the request and expense of the said E. F., his heirs or assigns, make all such further assurances for the more effectual conveying of the said premises with the appurtenances as may be reasonably required by him or them. And that I the said A. B., and my heirs, will warrant and defend the said premises, with the appurtenances, unto the said E. F. and his heirs and assigns, for ever.

In testimony whereof we have set our hands and seals this — day of — in the year of our Lord 184—
